

Customer Satisfaction Index July 2006

RESULTS

Introduction

This report presents the results for the Customer Satisfaction Index survey undertaken in July 2006.

The objectives of the research were:

- For *importance*, find out customers' requirements and their relative importance
- For *satisfaction*, find out our customers' perception of our performance
- To create *Priorities for Improvement* (to deliver resident satisfaction and build loyalty organisations must match their performance with residents' priorities and these PFIs are an indication of whether this is happening or not). Therefore, PFIs are extremely useful in deciding where best to focus resources on making the improvements that will contribute most to increasing resident satisfaction.
- To create a *Satisfaction Index* (an overall measure of customer satisfaction which can be monitored over time)

A standard satisfaction survey just measures residents' satisfaction with the services an organisation provides. However, a Satisfaction Index survey measures whether it is 'doing best what matters most to their residents'.

Methodology

The first survey of this kind for all public-facing services was undertaken in 2002. By building on this and to establish how important or unimportant chosen topic areas were to residents in 2006, two focus groups were held. Each group lasted for a duration of two hours and were held in Stratford-upon-Avon and Southam. The first part of the discussion looked at the attendees' feelings of satisfaction and dissatisfaction with the council in various subject areas. The second part of the discussions concentrated on the relative importance of each of the topic areas to those individuals. It must be recognised that all the topics within the survey are important and in their own right should be priorities for the Council. However, the survey gives the Council a way of ranking these priorities and it is these which the Council must look to improve. In this instance, a 10 point scale has been recommended as good practice.

A questionnaire was sent to 5000 randomly selected residents off the electoral role. 897 questionnaires were returned in the timeframe allowed (5 were undelivered). A response rate of 18% was achieved. For the comparatively long length of questionnaire, this is an expected response. According to specialists in this field, a return of 15-20% is the norm for this sort of research. On an observed statistic of 50%, the standard error of +/-3% was achieved in this survey.

Summary of Findings (I)

The following are based on **all respondents**: -

- The overall satisfaction score for all Council services is 73.3%, an increase of 1.7% on 2004.
- The highest rated score for a service is 80.2% - refuse and recycling. The lowest rated services are planning (67.3%) and parking (67.6%).
- Three services have improved their CSI score by more than 3% compared with the last survey – street cleaning, leisure facilities and housing. No service score went down compared with 2004.
- Compared against all 97 requirements used, the five highest scoring were: *the friendliness of refuse collectors; opening times of SDC offices; the helpfulness of refuse collectors; the provision of green wheelie bins; and the variety of equipment available in play areas.*
- The lowest scoring, which are the top priorities for improvement were: *the cost of car parking; being consulted on the District's planning policies; the building of schools, roads, etc in line with housing developments; the amount of information the Council provides on the future development of the District; and the availability of affordable housing across the District.*

Summary of Findings (II)

The following are based on **users** of a service: -

- The overall satisfaction score for users of Council services is 70.9%, a 2% increase on 2004.
- For every service, the CSI score for users of a service in the last two years is lower compared with the scores of all respondents. For example, the planning score for all respondents is 67%, but this falls to 64% for those who have used the service.
- Compared with 2004, the satisfaction of residents rose by 5% for those who had used the Housing service and used the Council's leisure facilities. Those contacting Council Tax were more satisfied, with their CSI score increasing 2.5%. All services saw an increase in their user CSI score, except for a negligible decrease of 0.1% in Environmental Health.
- The highest rated service aspects for users were the *opening times of SDC offices, feeling safe using SDC's leisure facilities, the information provided on SDC's leisure facilities and events, and the variety of equipment available at play areas.*
- The lowest rated aspects for users were the *cost of car parking, the availability of affordable housing across the District, being consulted on the Districts planning policies and the building of schools etc in line with housing development.*

Summary of Findings (III)

The following summarises the best and worst aspects for each service surveyed (these are the same for both "all respondents" and "users", except for the following: Best aspect for leisure facilities users was "feeling safe using the facilities" and the worst aspect for council tax users was the "accuracy of council tax billing"): -

Service	Best Aspect	Worst Aspect
The Council in General	Opening times of SDC offices	Returning telephone calls
Council Tax	Being able to contact the relevant person	Keeping promises and commitments
Environmental Health	Pest control in your locality	Noise control within your locality
Housing	Professionalism of housing staff	Availability of affordable housing across the district
Leisure Facilities	Information provided on SDC facilities/events	Cleanliness of leisure facilities
Parking	Provision of Park & Ride in the District	Cost of car parking
Parks & Open Spaces	Clean & tidy appearance of parks & gardens	Personal safety in Stratford parks
Planning	Professionalism of planning staff	Being consulted on the Districts planning policies
Play Areas	Variety of equipment available in play areas	Free of dogs / dog mess
Public Toilets	Lighting in public toilets	Number of public toilets
Refuse Collection / Recycling	Friendliness of refuse collectors	Range of items allowed for recycling
Street Cleaning	Removal of abandoned cars	Keeping the streets free from dog fouling

Summary of Findings (IV)

- The overall mean score for satisfaction with Council services in 2006 is 6.62, 0.13 higher than that achieved in 2004.
- More residents agree that the Council offers value for money in 2006 than it did in 2004. In 2004, the mean score was 5.47 out of 10; in 2006 it had risen to 5.68.
- Respondents were asked to make additional comments. The top three mentions are the need for more recycling facilities / better recycling (23%), the need to provide more wheelie bins and refuse bags (15%), and one in ten made comments that car park fees were too high. 9% asked to see a review of council tax bandings.

How we calculate the Customer Satisfaction Index

This example contains 10 requirements for a particular service:

Step 1. List all the average importance scores for each requirement and total them up.

Step 2. Calculate the percentage each average importance score is of the total of importance scores. This is the "weighted importance score" and adds up to 100%.

Step 3. Multiply the average satisfaction scores by the weighted importance scores, i.e. average satisfaction score (6.22) multiplied by weighted importance score (11.01%) equals 0.68.

Step 4. Add up the weighted satisfaction scores.

Step 5. Multiply the total of the weighted satisfaction scores by 10 to give us the Satisfaction Index expressed as a percentage.

When using the 10 point scale for satisfaction, 7 is regarded as an "acceptable performance", with 8 and above being the target to be achieved in the future.
