Policy H.01 – New Housing Development in Harbury Village

New housing development will be concentrated within the Harbury village settlement boundary (Map 1).

Within this boundary, proposals for new housing will be supported when they:

- a) do not have an unacceptable adverse impact on the parish’s rural landscape;
- b) conserve and enhance designated and non-designated heritage assets;
- c) do not have an unacceptable adverse impact on existing and future residential amenity;
- d) do not have an unacceptable adverse impact on the natural environment and protect and enhance biodiversity and habitats;
- e) do not lead to the inappropriate development of residential gardens that would cause harm to the village by reason of over-development, significant loss of useable garden spaces for both existing and proposed new properties, and loss of off-street car parking;
- f) are appropriately located for the users and residents of the proposed use to access local facilities and services; and they are appropriate in terms of size, scale, design and respect the character of the surrounding area.

Policy H.03 - Securing a Suitable Mix of Housing Types, Tenures and Sizes in New Development

To ensure that future housing development meets the housing requirement identified in the Core Strategy and also helps to meet the different needs that will arise over the plan period from the existing and future population, in housing developments of 6 or more dwellings, a range of types, tenure and sizes of dwellings will be required, including a proportion of homes to meet the needs of older and younger residents, as well as those seeking to build their own home. Before finalising the housing mix on such sites developers should consult and take into account the views of the Parish Council along with up-to-date demographic, housing need, self and custom build demand and strategic housing market information.

Policy H.04 – Local Needs Schemes

When a proven local housing need is properly identified, through a professional Parish Housing Needs Survey, and that need cannot be met by affordable housing provision through a market-led scheme under Policy H.03 local needs schemes will be supported in areas where housing will not normally be considered suitable unless it meets the following circumstances:

- a) In Harbury it should adjoin the village settlement boundary, and in Deppers Bridge it should be immediately adjoining existing built development in the hamlet;
- b) In Harbury village it is in reasonable walking distance of public transport and local community facilities;
- c) The future use of such housing is secured in perpetuity to meet a local need; and
- d) Consultation has taken place with the Parish Council to gain their support for the proposal.

Policy H.05 - Housing Development and Design Principles

Within the neighbourhood plan area all new housing development proposals should promote good design and be in keeping with the character of the area. In assessing proposals regard will be given to the following:

- a) Incorporation and reinterpretation of local building styles in development proposals so that these make a positive contribution to the village character of Harbury;
- b) Retention of open spaces in the village and protection of the rural nature of the wider parish;
- c) Retention of trees and hedgerows;
- d) Maintenance and enhancement of the existing settlement pattern, particularly the need to conserve the character and appearance of the eastern and western boundaries of Harbury village;
- e) Good design and suitable layout that takes into account topography of the site and its surroundings and views in to and out of the site;
- f) Appropriate use of local materials and details;
- g) When adjacent to the Conservation Areas or other heritage assets development should, where appropriate, be set back from road and street boundaries and should use appropriate boundary treatments and materials;
- h) Retention and preservation of significant and historical landscape features within the site, including older buildings which if proposed to be altered or extended make use of appropriate materials and styles; and

i) The use of suitable boundary treatments both to individual properties and full housing schemes. In particular, development on the edge of the villages should seek to retain existing hedges and trees and use native species for new planting.

Policy H.06 – Green Infrastructure

The mosaic of paths, paddocks, fields, watercourses and water features, woodland, grassland and other green infrastructure features within the parish should be maintained and enhanced for their recreational, tourist and ecological value.

Development proposals should seek to maintain this green infrastructure and, where possible, should enhance it by creating new connections and links or by restoring existing green infrastructure.

Development that would disrupt or sever this mosaic will not be supported unless suitable compensatory provision can be provided to establish a new connection within the immediate vicinity of the connection to be lost or severed.
