Subject: FW: Examiner Question

Dear Barbara,
The District Council's response to your question is as follows.

The District Council respectfully requests that the final sentence of the explanatory text to Policy H2 be removed from the Plan. The Site Allocations Plan is a standalone Plan which focuses on the identification of 'reserve sites' in accordance with Core Strategy Policy CS.16, following a suitable methodology for the identification of sites. Policy H2 of the NDP therefore has a different purpose from that of the Site Allocations Plan as it identifies housing sites and as such the methodology for the identification of sites will likely differ between the two Plans. For these reasons it is considered that the statement that Policy H2 of the NDP introduces a 'locally determined inset' to the Site Allocations Plan is considered to be misleading and should be removed.

Regards,
Jo
