Dear Jo

I have a further query on which I would welcome the District and Parish Councils' views .

Supporting text to Policy H2

In the Explanation to policy H2, on page 40 of the plan, reference is made to a policy H4 and to the District Council's Site Allocations Plan, as follows:

Policy H4 in this plan will, from the submission stage of the emerging NDP, introduce a locally determined inset (3) to the Site Allocations Development Plan.

Again, apologies for not spotting that we had taken policy H4 out of the final submission version.

This sentence should now read:

“Policy H2 in this plan introduces a locally determined inset to the emerging Site Allocations Development Plan.”

We feel that it is important to relate NDP Policy H2 to the District Council's ongoing work on the District-wide Site Allocations Development Plan to ensure that any prospective sites in the Parish as identified by the 'desk study' work on the latter plan do not conflict with the rigorous selection process that led to our site allocations. So we need to make clear that the NDP site allocations are the ones to go for.

Please can I have the District and Parish Council's comments on this sentence and whether it needs to be updated?

As with my previous questions, please note that these are public documents and the answers and any associated documents will also be in the public domain. Both my questions and the responses should be placed on the Councils' websites as appropriate.

Kind regards

Barbara
