

# LANGLEY COMMUNITY PLAN

May 2012

amended 28 May 2013

## INTRODUCTION

The Localism Bill, introduced to Parliament on 13 December 2010, was given Royal Assent on 15 November 2011, becoming the Localism Act, which resulted in the establishment of the National Planning Policy Framework in March 2012. The Act allows communities to have a say in the planning policy of their locality. This is achieved through a Community Plan, which is adopted by the District Council and incorporated into the Council's planning policies.

In the autumn of 2011, Langley Parish Council agreed that accordingly, a Plan should be prepared. To facilitate this, in January 2012, a questionnaire (formulated by the Parish Council and approved by the local District Councillor) was distributed to each household.

Questionnaires were distributed to all 66 households, and the Parish Council is most appreciative to everyone who took the time and trouble to complete and return them.

Of the 66, three households were unable to complete, for reasons beyond their control. Of the 63 remaining, 61 were returned - a creditable 97% response, reflecting the views of 133 adults (and some of the 25 under 18s), and one which demonstrates residents' strength of feeling.

## OBJECTIVE

The objective of this plan is to inform the future decisions of Langley Parish Council, Stratford upon Avon District Council and Warwickshire County Council, where those decisions may have an impact upon the services and amenities available to the residents of Langley, or upon the development of the environment (built or natural) of Langley, or upon development that might affect the residents of Langley or its surrounding area.

The questionnaire was designed to enable the development of a plan which reflected the views of as many Langley parishioners as possible, and to focus on:

- ◆ The profile of the Village and its residents
- ◆ The Village now, in terms of amenities, infrastructure and environment, and
- ◆ The Village in the future, and how it might look and improve.

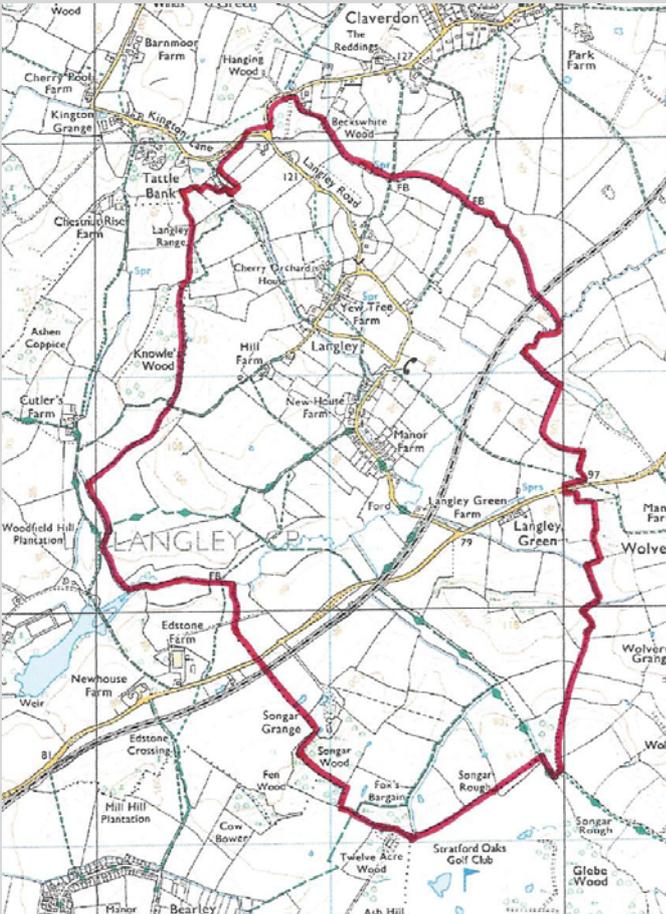

## CONTENTS OF THE PLAN

- ◆ The Parish
- ◆ Village Profile
- ◆ Roads and Infrastructure
- ◆ Services
- ◆ Environment and Countryside
- ◆ Community
- ◆ Development Considerations
- ◆ Summary of Views
- ◆ Conclusions
- ◆ Items for Consideration
- ◆ Questionnaire Data

*Langley at leisure -  
the annual village barbeque*

## THE PARISH

Langley is located approximately six miles to the north of Stratford upon Avon town centre. The parishes bordering Langley are

- ◆ Bearley
- ◆ Claverdon
- ◆ Norton Lindsey
- ◆ Wolverton, and
- ◆ Wootton Wawen

The Village was mentioned in the Domesday Book as 'Longlei', which is understood to be Saxon for "a long woodland clearing".

*The Parish of Langley, with the boundary shown in red*

The residences of Langley are, for the most part, distributed along the principally north/south Ford Lane and Spring Lane, which run from Claverdon down to the east/west road connecting the A3400 Stratford/Henley road to Norton Lindsey and Warwick. The lanes are extremely windy and steep in parts, with a ford at the southern end; sporadic flooding occurs to either side of this from time to time. Further, the Parish is bisected by the railway line connecting Bearley and Claverdon stations. Green Belt farmland makes up the remainder of the Parish. It is believed that a couple of houses can be traced back to the time of Shakespeare.

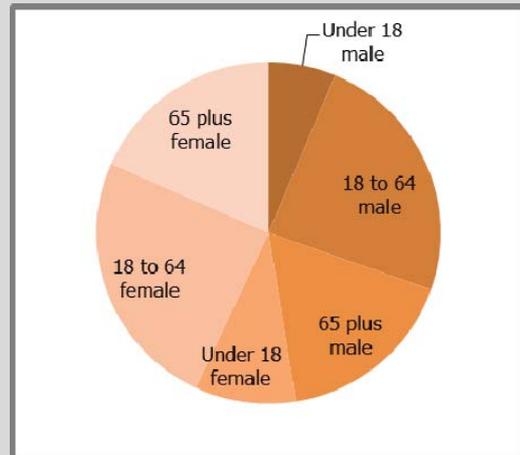

## VILLAGE PROFILE

### POPULATION

Langley is comprised of 66 households. Of the total respondents:

- ◆ 35% were over 65
- ◆ 49% were between 18 and 64, and
- ◆ 16% were under 18

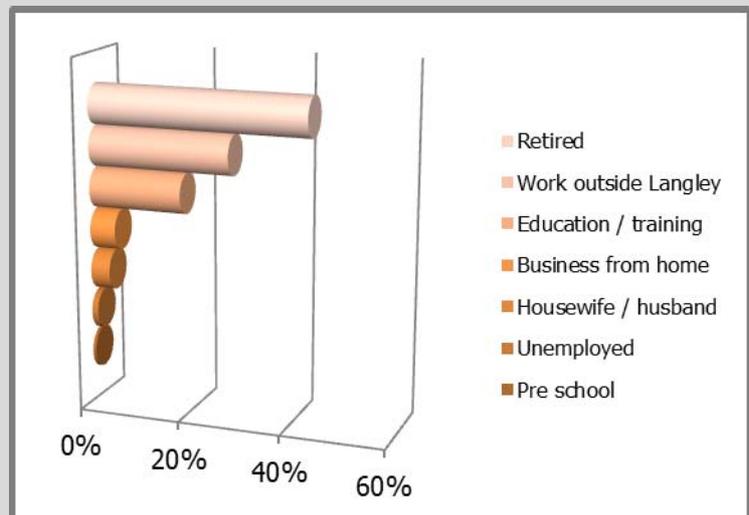

97% of houses are owner occupied.

### OCCUPATIONS

Whilst over a third of respondents were aged over 65, with regard to occupations:

- ◆ 43% were retired
- ◆ 28% working outside Langley
- ◆ 18% in education / training
- ◆ 5% working from home
- ◆ 4% housewife / husband
- ◆ 1% seeking work
- ◆ 1% pre school

### TRANSPORT

Car ownership is not unexpectedly, high, based on the fact that there are just two bus services per week, with an average of two cars per household.

A range of views were expressed regarding the use of public transport, but it was generally acknowledged that any kind of frequent service for the Village, particularly in relation to work / education commuting purposes would be uneconomic for the potential numbers involved.

### SECURITY

The vast majority of households were extremely supportive of the Neighbourhood Watch scheme. There has been a relatively low incidence of crime in recent years, with just five households having been affected by burglary / vehicle crime in five years, (half of whom said they were satisfied with the police response). Notwithstanding, the general feeling was that precautions might be strengthened further, although opinions were equally divided on the issue of CCTV cameras; half of residents would welcome them but half felt that they would detract from the Village's rural nature.

## LIFE IN LANGLEY

A small village, with minimal amenities - just the church and village hall - may not be for everyone. However, the response indicated that residents like it that way, and it is generally why they came to live here.

By way of illustrating this, a few of the comments from the responses to the questionnaire:

*St Mary's Church: the Epiphany Window - recently mentioned in the "Da Vinci Code"*

*"Life in Langley is good"*

*"We find Langley neighbours very helpful and like Langley as it is – please leave Langley alone!"*

*"The current level of services and amenities and restrictions on development were the appeal of the village. If this were to change we would look to move out."*

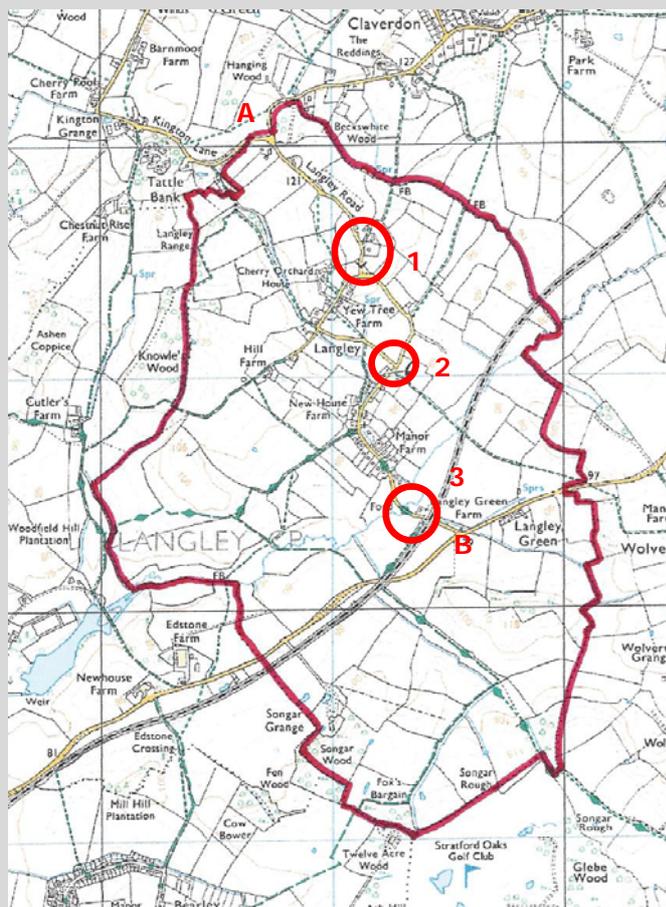

*"Langley is a lovely, unspoilt village with friendly neighbours who make an effort to look after each other. Let's keep Langley lovely!"*

*"The semi-rural nature of Langley contributes to its charm – we wouldn't want to lose that!"*

*"The beauty of Langley should be preserved as such."*

## ROADS AND INFRASTRUCTURE

A major concern to residents relates to the speed of vehicles and particularly large vehicles travelling through the village, and the apparent use of Ford Lane as a “rat run”.

This can be particularly problematical at specific danger areas:

- 1 The sharp bends and steep hill between Harrow House and past the White House,
- 2 The blind exit from Spring Lane, and
- 3 The bends and narrow road outside Silk Motors and the Ford.

The 30mph speed limit is often not adhered to, and in any event this is considered too high by a number of residents, who feel that 20mph would be more appropriate with regard to the danger areas above, but would need enforcement. Further, the stretch between Claverdon and towards the lower end of Spring Lane is, surprisingly, derestricted.

The village has just two entry/exit points, at ‘A’ and ‘B’ on the map. A number of suggestions were made regarding improved ‘slowing’ signage and possibly other devices at these points. It was also suggested that consideration could be given to the introduction of security cameras at these points, as a further deterrent to would-be criminals.

## OTHER CONCERNS AND SUGGESTIONS

**Potholes:** Remedial works required. Also, ‘self created’ passing places do not have properly made up surfaces, resulting in ruts.

**Verges:** Being destroyed by speeding and careless drivers (although only 4% of respondents wanted kerbs).

**Road cleaning:** It was felt that roads, drains and verges should be better cleaned and maintained by the local authority.

**Improved visibility:** Trimming of hedges and cutting back of trees to improve visibility.

**Bicycle races:** It was suggested that pre-notification could assist in planning farm vehicle movements.

**Footpaths / Bridle paths:** Most respondents were appreciative of the network of footpaths and bridle paths surrounding the Village, but expressed the view that they should be properly maintained.

## THE FORD

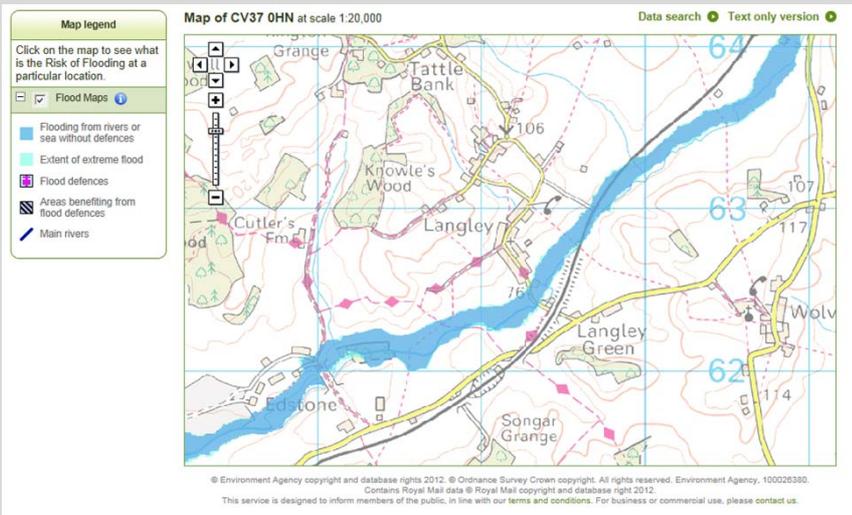

Respondents' comments acknowledged that the tendency to flood had substantially reduced since the downstream side was cleared, even allowing for the fact that there had been reduced rainfall in more recent times. Only a small percentage thought that a bridge should be considered, but a number were of the view that signage needed to be improved. Most considered that ongoing clearance was necessary to maintain the improved performance.

The Ford was highlighted as one of the danger spots within the Village, and it was suggested that consideration should perhaps be given to a degree of widening, adjustment or other physical or visual device to improve traffic safety.

It was also suggested that the area in general could be visually improved and made more of a feature of the Village.

### FLOOD PLAIN

The map indicates the area of risk of flooding, but this is just part of the story. There are a couple of smaller streams which converge with the ford, and at times of serious flooding the area of flood can extend further up into the village and also under the railway bridge.

### SERVICES

The vast majority of respondents were happy with local services, with the exception of mobile telephone reception which most people advised was dreadful; however, most did not wish to have a mast to alleviate the problem. On that basis, it would appear that patience is required whilst satellite phone technology is developed further.

A lesser number were also concerned regarding broadband speed, although it is acknowledged that this is being addressed at District level, and a high speed service is anticipated by 2014/2015.

With regard to services in the future, a quarter of respondents would like to have mains sewerage, and a third mains gas - although 93% would not be happy with the development potential that these might bring.

## ENVIRONMENT AND COUNTRYSIDE

The majority of respondents are keen to preserve the countryside within and outside the Village as it is.

Their major concern related to the infringement of the Green Belt, and it was felt that government proposals could be a very real threat to one of our most important assets in the Village - the countryside.

A fifth of respondents were concerned about each of the following: traffic noise, low flying aircraft and high hedges. Less than 6% had concerns about the Hunt, bonfires, shooting, and wild, farm and domestic animals, and although problems with bird scarers were a similar small percentage they seemed to raise a disproportionate amount of hackles.

## COMMUNITY

With regard to community projects such as stream clearing, footpath clearing, and nature conservancy, two thirds of respondents have expressed their willingness to become involved

However, it was also stated that such projects should not affect the responsibilities of the local authority in respect of properly maintaining the verges, ditches and lanes.

**THE VILLAGE HALL** is currently used for a range of community activities, and comment was made that thanks to various committees, it is used more now than at any time in the last 20 years. Notwithstanding, there were a range of suggestions for additional uses by the community.

## DEVELOPMENT CONSIDERATIONS

### THE GREEN BELT

The possibility of the District Council proposing to take the Village's existing 'built up' area inside the Village out of the Green Belt for easier planning permission was unpopular with three quarters of respondents, with around one fifth being in favour and the remainder unsure. It is understood that this is no longer to be pursued.

The need for stricter planning controls in the Green Belt 'buffer zone' between villages was endorsed by three fifths, with the vast majority of the rest opting for the current status quo.

The provision of a gypsy/traveller site within the village was opposed by 98% of respondents; lack of infrastructure is a major factor in this respect.

### DEVELOPMENT VIABILITY

A number of people made the point that development of any size would require major infrastructure investment, in new roads, mains drainage, mains gas and public transport – totally disproportionate to the number of houses which might be squeezed in. Further, even if this were financially possible, the existing road and railway constraints and general topography would make this extremely challenging physically.

Towards half of respondents were against any development in Langley, with just 5% favouring development, and the remainder unsure.

Questions related to the following categories of residential development, and responses are set out accordingly:

- ◆ Local homes for local people: 13% were in favour, with 41% against and 46% undecided. Some scepticism was expressed as to how such a system could work.
- ◆ Starter homes: 6% were in favour, with 69% against and 24% undecided.
- ◆ Retirement homes: 8% were in favour, with 73% against and 19% undecided.
- ◆ Sub-division of large properties: 6% were in favour, with 55% against and 40% undecided.
- ◆ Infill: 9% were in favour, with 62% against and 30% undecided.
- ◆ Minor extensions (as now): 61% were in favour, with 2% against and 37% undecided.

In summary, 46% wanted no development in the village, 49% were unsure, and just 5% were in favour.

Objections to development were also raised in respect of increased traffic generation and noise.

## IMPROVEMENTS

Notwithstanding the views on development, several suggestions were made regarding improvements in the Village. These related to the creation of a public space between Silk Motors and the Ford (which could also assist in traffic calming in this area), and possibly the eastern end of Spring Lane - both currently viewed as danger areas.

## SUMMARY OF VIEWS EXPRESSED IN RESPONSE TO QUESTIONNAIRE

Respondents' main concerns appear to be speed of traffic through the Village particularly at danger spots, condition of the lanes, and possible infringement of the Green Belt.

Unsurprisingly, fear of crime appears to be greater than actual experience of it.

The Village's lack of infrastructure and amenities and its location - no mains drainage, no mains gas, poor mobile phone signal, no employment opportunities, no regular public transport, no school, no shop, no pub, no street lights, narrow lanes, a ford at one end and a steep hill at the other, and a constraining railway running through it - indicate that further housing development is impractical and not wanted by the majority of the residents.

Despite these apparent drawbacks to 21st century living, there is an underlying affection for the Village and for those who live in it.

## CONCLUSIONS

The Parish Council has drawn heavily upon the views of residents as expressed in the responses to the questionnaire in formulating this Plan. Councillors have had regard to their own experience and knowledge of Langley. Councillors have also had regard to the challenges and issues facing the District and County Councils, knowledge of which is derived in particular from briefings given by the local District and County Councillors, both of whom regularly attend and speak at Parish Council meetings.

The Plan was put in draft before the annual open meeting of the Parish Council that was held in Langley on 30th April 2012. The draft had been available to residents in advance, and comments expressed upon it both in advance and at the meeting were taken into account before the plan was finalised. The Parish Council believes this Plan to be the result of an effective and widespread consultation process.

THE CONCLUSIONS ARE AS FOLLOWS:

- 1 There is strong and widespread support for tight controls on development in the Parish, both within the built up area of the Village and outside that area in the Parish.
- 2 This is despite that fact that there are obvious disadvantages in living somewhere as comparatively remote and undeveloped as Langley. For example and in particular; Langley lacks mains sewerage, mains gas, an effective public transport service, effective mobile telephone network, and facilities such as pub, shop, and school. The overwhelming view of residents is that we would rather manage without these if they would bring unwelcome and inappropriate development in their wake.
- 3 The strength of this view is further highlighted by the fact that there are many residents in Langley whose children are of an age where they might be expected to want now or in the near future to establish their own homes in the Village. Despite this, there appears to be no desire or need for housing development to cater for this.
- 4 The Parish Council further believes that the physical geography and services of Langley indicate that further housing development cannot be justified or sustained. A single minor road produces just one point of entrance/exit at each end of the Village, with the potential for closure of one of these at flood times. A hill at the northern edge, road at the southern edge, and a railway bisecting it, restrict the Village. Current levels of services, which appear unlikely to increase, would not support a significantly larger population.

The Plan therefore supports the continuation of strict control of development, particularly housing development.

The Parish Council has identified a number of areas where work should be done to improve the amenities of the Village. The details of these proposals do not form part of this Plan, as a number of them are of a minor or short term nature, and their inclusion might detract from the longer term view that this Plan aims to take. The Parish Council intends to be active in reviewing and acting upon these proposals. They are covered in the following broad areas, namely:

- ◆ **Improve security**
- ◆ **Roads**
  - ◇ Speed limits and safety aspects
  - ◇ Condition and maintenance
  - ◇ Footpath and bridleway maintenance
  - ◇ Local authority responsibilities
- ◆ **The Ford**
  - ◇ Improvements
  - ◇ Maintenance
  - ◇ Signage
  - ◇ Amenity development
- ◆ **Green Belt**
  - ◇ Use this plan to ensure only appropriate development
- ◆ **Village Hall**
  - ◇ Review thoughts on additional uses, as a way of promoting a vibrant community
- ◆ **Improvements**
  - ◇ Consideration of further enhancements
