The Neighbourhood Plan has an exciting vision for the future, looking to protect the rural nature of our beautiful setting, to provide the right sort of housing for our changing population and to continue to foster and protect the emotional and social needs of all our residents from the very young to the more frail or isolated.

Our vibrant and resilient community has faced an unprecedented period of change over the last five years due to extensive housebuilding. This rapid expansion has brought its own particular challenges, to which the community has risen by continuing to warmly welcome new residents and appreciating their involvement in and contribution to village life.

In very much the manner of Long Itchington, the desire to formulate a Neighbourhood Plan is as much a pragmatic response to change as it is a need to exert some control over our future. The Long Itchington Neighbourhood Plan area is an attractive place to live and its residents seek to ensure it continues to be so.

Residents here are not shy to make their feelings known and by responding in record numbers to our formal and informal questions they have given us a clear and focused direction for the next decade.

We look to the future with enthusiasm and a desire to retain all that we value here, in a spirit of creativity, to enhance what is a very lovely place to live.

Our Neighbourhood Plan demonstrates what residents of the parish hold dear – community, inclusivity and all the positives of rural life.

Cllr. Barbara Atkins

Chair, Long Itchington Parish Council

1. Introduction

- 1.1** This Neighbourhood Plan is an opportunity to promote and support change to improve the lives and well-being of local people including those who have recently chosen to move to newly built houses and join the community. It recognises the need to contribute to meeting Stratford District Council and neighbouring areas' new housing needs identified in the Core Strategy in a sustainable way. However, it seeks to protect the Neighbourhood Area from inappropriate development that could damage the very environmental and social characteristics that currently make Long Itchington an attractive place to live, work and visit.
- 1.2** The broad result of consultation with local people is that the community, spread across the settlements of Long Itchington Village (including Model Village), Bascote and Bascote Heath, wants to protect the area's rural character that is at the heart of its attractiveness.
- 1.3** The community sees the Neighbourhood Plan as an opportunity to take greater control of how future development and land use will impact on all of our lives. This is demonstrated by the high level of involvement of local people and businesses providing the evidence for the policies and proposals in this plan. This level of involvement has, in part, been driven by the scale of recent developments and also the fact that residential developers continue to promote large scale proposals that, if allowed, would have major impact on the area and its community.
- 1.4** The Neighbourhood Area has experienced significant change over recent years and the growing community has proved its ability to adapt and thrive. So far, this has been achieved because the pace of development has been manageable. From 1960 to 2011 (51 years) a total of 323 residential units were added to the Long Itchington village housing stock. Between 2011 and 2021 (10 years) a further 312 units have been built or are under construction. This scale and particularly recent pace of growth poses a challenge to the community's ability to continue to adapt and retain the features of village and rural, small settlement life that differentiates it from the environmental and social characteristics of urban areas. However, the community and its elected leaders are committed to welcoming all new residents and encouraging them to take advantage of, support and develop the many benefits of local life in the Long Itchington Neighbourhood Area.
- 1.5** The Neighbourhood Plan vision is that it will ensure the Neighbourhood Plan Area adapts to improve the quality of life for all local people and meet their housing, education, enterprise and employment, leisure and cultural needs. The vision and how it is to be achieved is set out in detail in Section 4 of this document.
- 1.6** Long Itchington Parish Council has promoted the introduction of a Neighbourhood Plan and its aim is to confirm this common vision for the Neighbourhood Area by the majority of local people choosing to support the Plan.
- 1.7** The Pre-Submission Consultation on this emerging Neighbourhood Plan coincided with Stratford District Council's publication of the draft Site Allocations Plan (SAP) that makes proposals affecting the defined Neighbourhood Area. The timescales for the SAP are currently being reviewed. See: <http://www.stratford.gov.uk/planning-building/site-allocations-plan.cfm> It is recognised that, depending on the outcome of consultations on both documents prior to their respective adoption, amendment of this Neighbourhood Plan may be required.
- 1.8** Statutory guidance has been followed in developing the Neighbourhood Plan in order to ensure that it meets the basic conditions for its successful adoption. The Public Sector Equality Duty requirements of the Equality Act 2010 have been taken into account in developing the Plan. In addition, support and guidance from Stratford-on-Avon District Council has been obtained as well as professional planning advice specifically commissioned from a local consultancy.

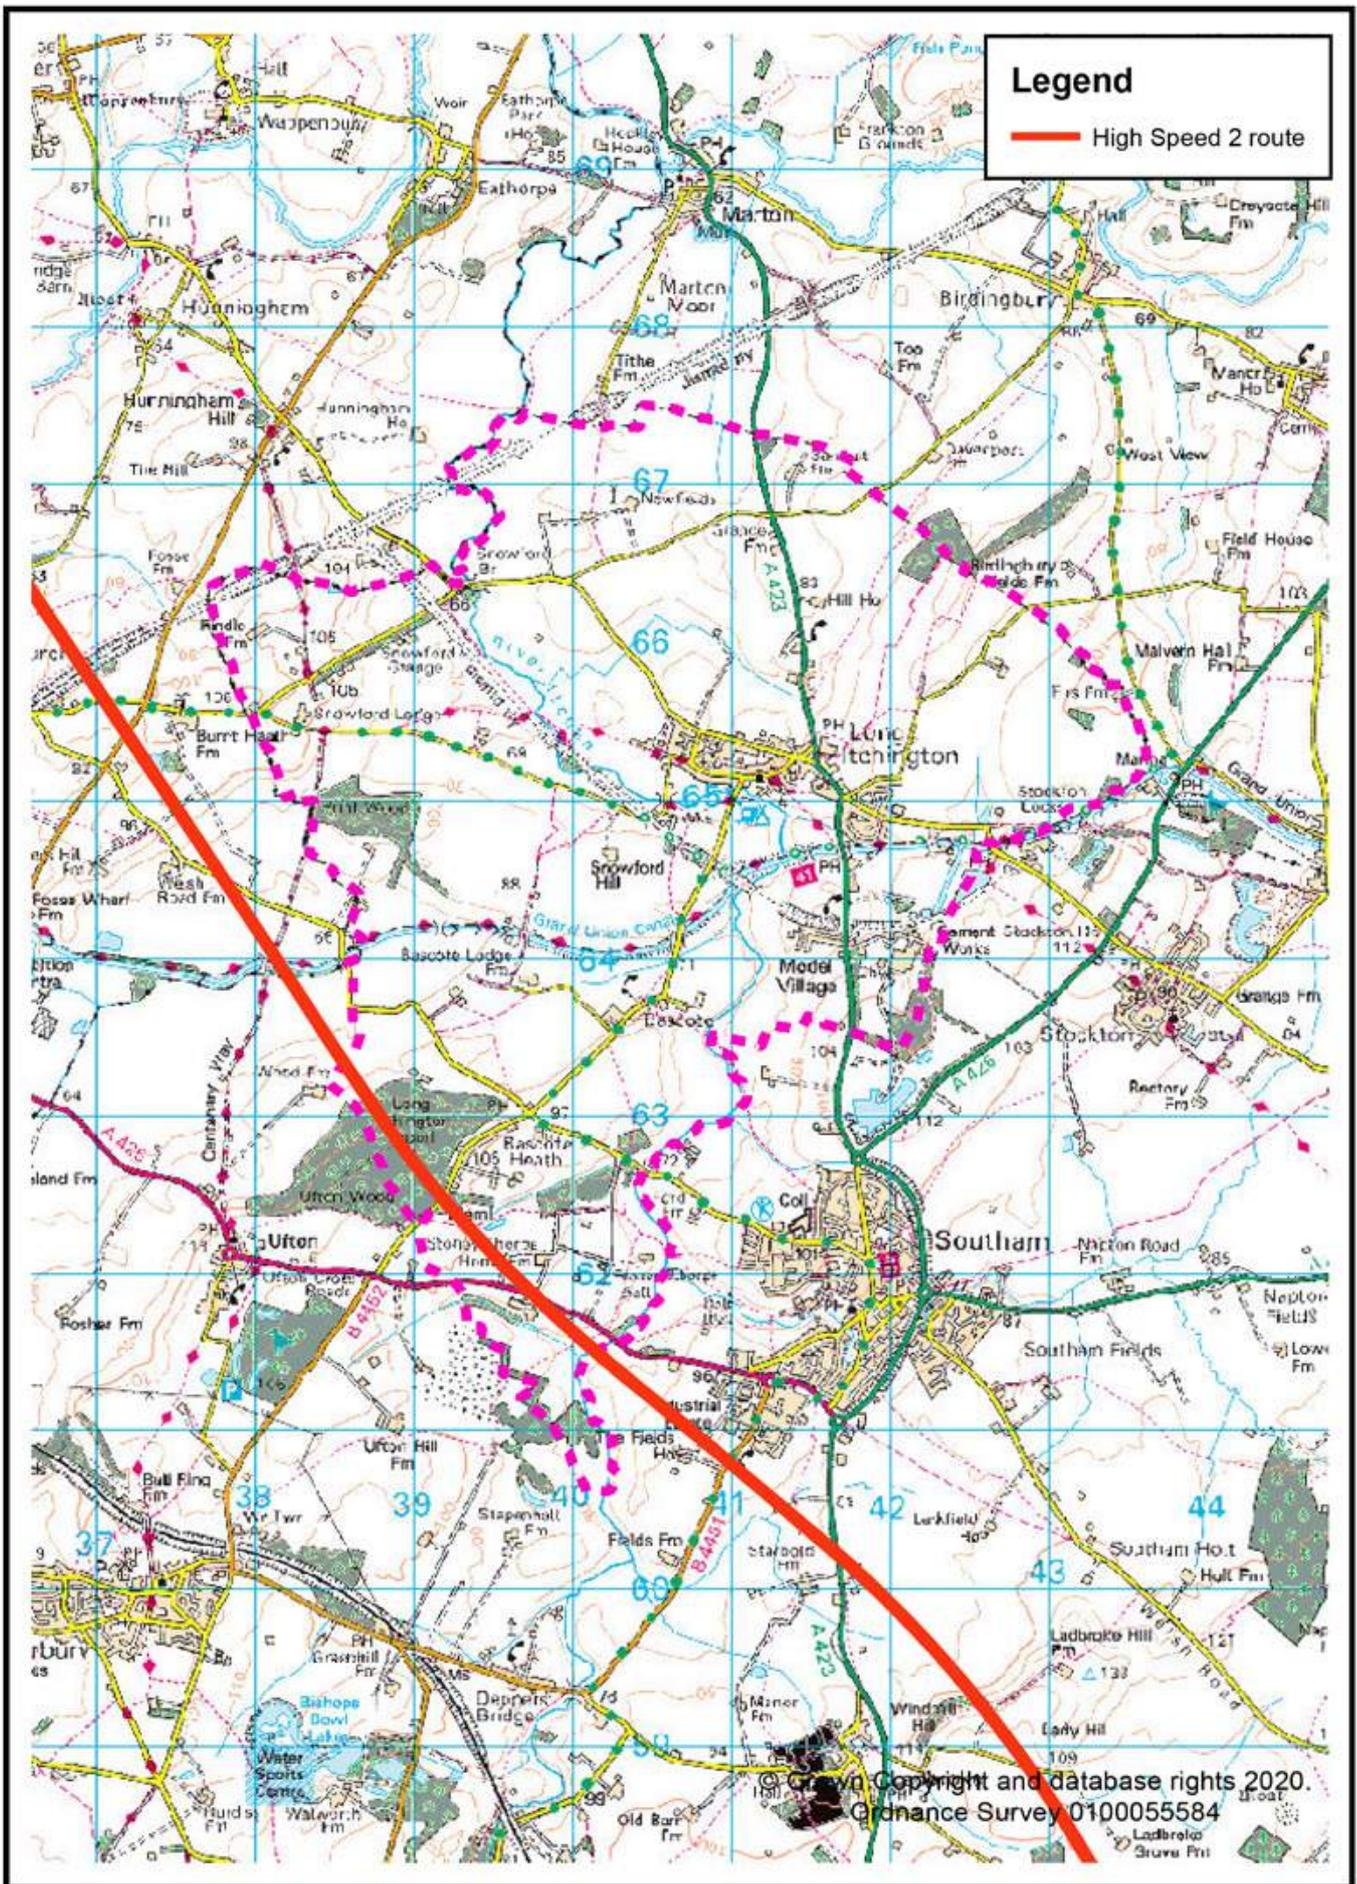

Figure 1: Designated Neighbourhood Area

2. Location and Geographic Context of the Long Itchington Neighbourhood Area

- 21** Long Itchington Neighbourhood Area is in south-east Warwickshire, approximately 12 miles south of Coventry, 15 miles north of Banbury and 6 miles east of Royal Leamington Spa. Its nearest settlement of significant size is the market town of Southam approximately 2 miles to the south.
- 22** The Neighbourhood Area covers approximately 5,000 acres (2000 hectares). At its heart is Long Itchington village but Model Village, Bascote and Bascote Heath are important, distinctive settlements within the Neighbourhood Area. The Neighbourhood Area boundary is marked on the plan in **Figure 1**.
- 23** Long Itchington has been designated as a Category 1 Local Service Village in Stratford-on-Avon District Council's planning Core Strategy (Section 5, paragraph 5.1.10).
- 24** Long Itchington Village lies either side of the A423 road between Coventry and Oxford. The Grand Union Canal runs east/west through the Neighbourhood Area on the southern edge of the village. The former Leamington Spa to Weedon railway line passed through the Neighbourhood Area but finally closed to freight in the mid 1960s. The disused line is now part of the Sustrans Charity's Route 41 national cycle network and an important leisure, recreation and wildlife habitat. The HS2 railway line currently under construction will run across the southern tip of the Neighbourhood Area partly in a tunnel. The route is shown on the plan in Figure 1. The HS2 railway line will permanently affect the road route to Leamington. Vehicles will be diverted southwards along the Fosse Way before turning right towards Offchurch resulting in it being less direct and increasing journey time.
- 25** There are approximately 12 miles of public footpaths and bridleways running throughout the Neighbourhood Area. These link with the canal towpath and Sustrans route and are an important and well used leisure resource for local people and visitors.

- 26** The Neighbourhood Area is served by the following principal transport links and services:

Motorways

M40 – North/South access at Gaydon (Jct.12, approx. 9miles) or Banbury (Jct. 11, approx.17 miles).

M1 – North/South access west of Northampton (Jct.16, approx. 18 miles) or southbound only via the M45 (Jct.17, approx. 16 miles).

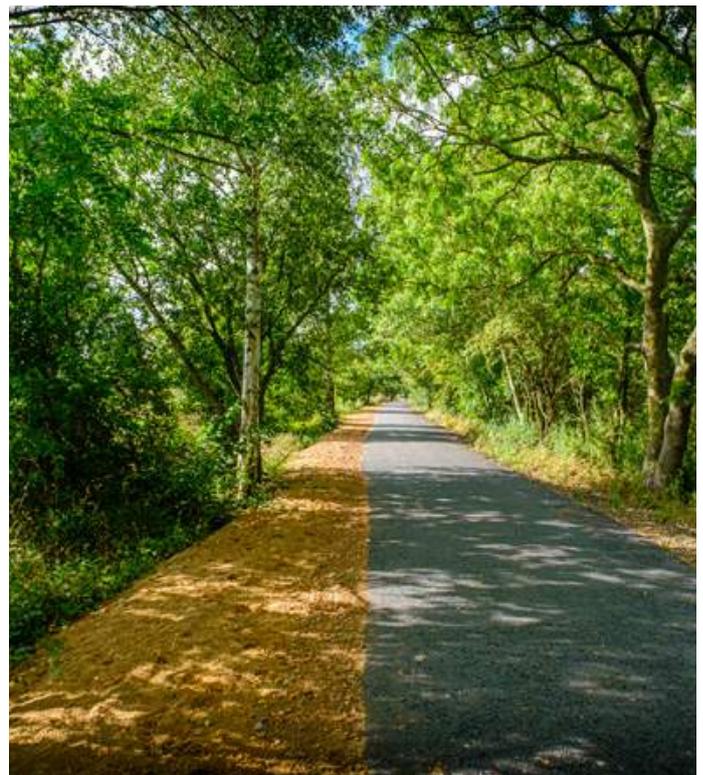

Rail Services

West Coast Mainline Services from Coventry (approx. 12 miles) or Rugby (approx. 12 miles) to Euston Station, London or destinations north to Glasgow.

Access to Chiltern Railways, Cross Country and West Midlands Trains services is available at Leamington Spa (approx. 7 miles) including a service to Marylebone Station, London.

Bus Service

One Stagecoach bus route, running between Leamington Spa and Rugby, passes through Long Itchington Village.

3. The Origins and Growth of the Long Itchington Neighbourhood Area

- 3.1 The geology of the Neighbourhood Area is that the ground is of early Jurassic Blue Lias rock formation. This continues to have an important effect on all aspects of the development and life of the Neighbourhood Area. The rock has, for many years, been extensively quarried in the area as a source of building stone, agricultural lime and as a raw material of the cement industry.
- 3.2 The Neighbourhood Area lies within the ancient 'Feldon' region of Warwickshire, an area of mainly low-lying land extensively cultivated since pre- Roman times.
- 3.3 Long Itchington village has been where it is now, or thereabouts, for at least 2000 years. The name means 'farmstead by the River Itchen'. The river was part of the boundary of Queen Bodicea's Icene Tribe territory as it resisted the Roman invasion of the country from the south and west. The original settlement, close to White Hall Farm on the western edge of today's village was abandoned and re-established around the church.
- 3.4 Incremental development and growth took place up to the 20th century before there was significant residential development from the 1950s onwards. The most recent developments along the Marton Road (Lilac View), next to and opposite the school on Stockton Road (Spinney Fields and Keeper's Meadow) have expanded the village footprint. The large number of buildings and structures that are listed as being of historical interest or importance provides evidence of the development of the Neighbourhood Area over the centuries. There are 34 in total distributed throughout the Neighbourhood Area. They include a wide variety of structures from Holy Trinity Church to a flight of locks on the Grand Union Canal. All are important assets that contribute to the rich heritage and character of the area.

Full details can be found by searching the List at <https://historicengland.org.uk/listing/the-list/results/?searchType=NHLE+Simple&-search=Long+Itching&search=Long+Itchington>.

- 3.5 Listed Buildings within and clustered around Long Itchington village are identified on the map in Figures 2a & 2b. A significant number of these structures help to define the boundary of the Long Itchington Conservation Area first designated in 1969 with further amendments made in 1997. The current boundary of the Conservation Area is also shown on the map in **Figure 2a**. This represents the historic core of Long Itchington village and is a highly important environmental and social characteristic to be protected and enhanced for the future.

- 3.6 The development of Model Village deserves special mention. This small settlement off the A423 road to Southam, close to the main Long Itchington village was built in phases from 1912 by Kaye and Co. to house workers at its nearby cement works. The final phase of the original development was completed in the early 1920s long before much of the more "modern" housing was built in the village centre. It is an important example of the social and economic

life of the period. The design of dwellings and layout of the development illustrates the Company's enlightened approach to accommodate its workers and their families to a high standard and reflects lifestyles of the times. Houses were built in generous plot sizes to allow for food cultivation and pigsties were provided nearby for their animals.

- 3.7 The accelerating pace of growth in the built environment is illustrated in the table set out in **Figure 3a** showing the dates and scale of significant residential development (including planning permissions granted) up to 2011, the beginning of the Stratford-on-Avon Core Strategy. The table set out in **Figure 3b** includes more detailed information about developments approved and undertaken since 2011 with an analysis of housing types and tenures at each site.
- 3.8 There is evidence that Long Itchington has been an important settlement for many centuries. The Domesday Book completed in 1086 records 99 households in the settlement,

the third largest in Warwickshire. This compares to 69 households in Coventry at the time. Long Itchington's tax liability recorded in the Book was the third highest in Warwickshire and indicates the prosperity and status of at least some of its inhabitants.

- 3.9 The economy and prosperity of the Neighbourhood Area continued over the centuries largely based on agriculture. However, from the 17th century the economy began to be influenced by the geology of the area. At first this took the form of stone quarrying, then brick making, production of lime for agricultural use and eventually large-scale extraction of clay for the production of cement. This remains the most significant industrial activity in the Neighbourhood Area today and will continue to be a key economic and environmental feature for the foreseeable future.
- 3.10 Today's economy is diversified. Agriculture continues to be a core activity as well as clay extraction. Other important business sectors

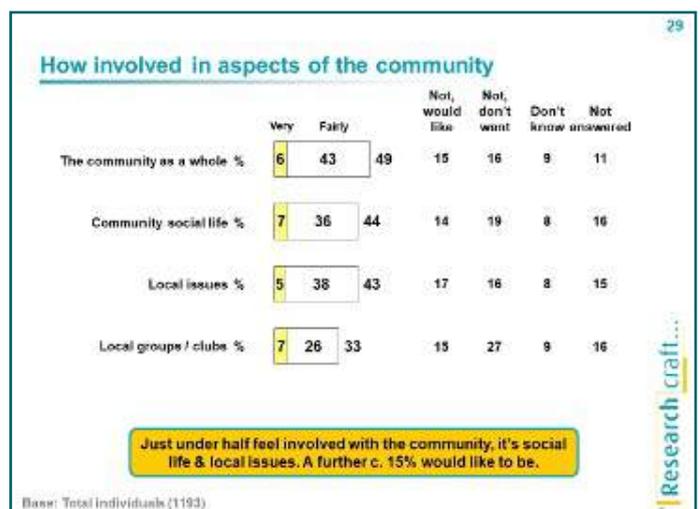

that have either developed or chosen to locate in the Neighbourhood Area include manufacturing, transport depots and vehicle repairs, leisure and hospitality, retail and other local services. However, it must be noted that these businesses employ limited numbers of people in relation to the total population of the Neighbourhood Area. In addition, our Questionnaire Survey revealed a significant number of varied businesses being run from homes in the Neighbourhood Area. Economic activity is essential to the prosperity and well being of the Neighbourhood Area and its community. This Plan, therefore, seeks to encourage and support business viability, growth and the creation of local employment opportunities providing that it is consistent with the policies contained within it.

- 3.11 The social fabric of the Neighbourhood Area has developed along with its physical growth and development. Characterised by absentee landlords in the Middle Ages a hierarchy developed that can still be seen today from the evidence of historic buildings including, for example, Stoneythorpe Hall, the original Manor House (now Manor Farm), the Tudor House, White Hall and more humble dwellings occupied by agricultural and other workers.
- 3.12 In addition to the evidence of wealth, poverty also existed. Records show how local benefactors established local charities from the early 1600s to provide the 'safety net' for those in need. This philanthropy later extended to the provision of education for local children and even today some of the earliest charities formed the origins of the Long Itchington Education Fund that continues to support young people of the Neighbourhood Area in their educational pursuits and personal development.
- 3.13 This sense of community still very much exists and the results of our Questionnaire Survey (that achieved an extremely high response rate of 74%) (see Charts 29 and 30, page 63) show that it is seen as an important and valuable asset to be protected. From the accelerated growth of the local population in the 1950s the Neighbourhood Area's Parish Council and its community has sought to welcome and

integrate new residents. Incremental growth when new residents arrive in relatively small numbers and are dispersed throughout the parish has been manageable. Until 2016 the largest number of families arriving within a short space of time was 55 at Dale Close. More recently it has been a greater challenge to assimilate larger numbers, for example, Phase 1 of Spinney Fields (75 new families) closely followed by Phase 2 (75 new families), Lilac View (58 new families) and Keepers Meadow (81 new families). Despite best efforts it has been harder to get to know everyone and provide the usual "Welcome Pack" to all new residents, but the commitment to achieve this continues.

- 3.14 There are approximately 26 voluntary organisations active in the Neighbourhood Area offering the opportunity for everybody to be engaged in local life either as users of facilities or as volunteers. The Parish Council, made up of Councillors drawn from a wide cross section of the community, is committed to welcoming everyone and making Long Itchington an even more attractive place to live. The community works together to be strong, cohesive, active and vibrant. This continues to be a shared goal. A key objective of this plan is to ensure that growth is sustainable and that this goal is achieved.

FIGURE 3a: Housing Growth Table 1960 - 2011
(Calculations based on 603 dwellings at the start of the period)

Housing records within the parish have been kept by Long Itchington Parish Council since 1960. The calculation of housing numbers has been achieved without recourse to the Census because Long Itchington was combined with Ufton which distorted numbers.

Year Dwelling	Location	Market	Affordable	Number of Bedrooms					Houses	Bungalows (Flats & Dormers)	Total Built	Total Housing Units in Neighbourhood Plan Area	% Increase from 2011 Base	Notes
				1	2	3	4	5

FIGURE 3b: Housing Growth Table 2011 to 2021 (including house type analysis)

4. The Vision for the Long Itchington Neighbourhood Area

- 4.1 The intention to produce a Neighbourhood Plan for the Neighbourhood Area was launched at a public meeting at Long Itchington Community Centre in October 2015. The ideas and comments expressed at the meeting together with the results of subsequent consultation with voluntary groups active in the Neighbourhood Area were used to formulate the following Vision Statement:

“Our Vision for the future is to ensure that the Neighbourhood Area adapts to improve and protect the quality of life for all local people and meet their housing, education, enterprise and employment, leisure and cultural needs.

This must be sustainably achieved by:

- *Protecting the rural character of the area*
- *Preserving the historic features and heritage of the Neighbourhood Area*
- *Enhancing and protecting the natural environment*
- *Ensuring that our community remains cohesive, inclusive, active and vibrant.”*

- 4.2 The Vision Statement also identified five themes that would form the framework for developing the Neighbourhood Plan and these are as follows:

- **Housing** – Promote the provision of appropriate housing to meet the needs of all individuals and families in our community. It is, however, accepted that the Neighbourhood Area must also contribute to the overall housing need of the district identified in the Core Strategy.
- **Business, Employment and Enterprise** – Promote the provision of facilities, including land, property and infrastructure, to support thriving businesses throughout the Neighbourhood Area.
- **The Natural and Built Environment** – Enhance and protect the rural character of our Neighbourhood Area for the wellbeing of all residents and ensure high quality design of buildings, structures and open spaces.

- **Community** – Ensure that local voluntary groups and organisations have access to suitable accommodation, facilities and resources to provide social and cultural activities that underpin an even more active, cohesive and inclusive community.
- **Sport, Leisure and Recreation** – Promote the health and wellbeing of local people through provision of high-quality leisure and recreation facilities including improved access to the local countryside.

- 4.3 The draft Vision Statement was adopted by the Neighbourhood Area Parish Council, published and distributed to every household and business in the Neighbourhood Area. The full document is included in **Figure 4**.
- 4.4 The five themes helped the development of a set of comprehensive questionnaires aimed at all residents (aged 16 years or over) and businesses designed to be the primary evidence base for the development of detailed policies. The results of the surveys have been aligned to the five themes to ensure that policies reflect the views and priorities of local people.
- 4.5 A full explanation of consultation undertaken, including the comprehensive questionnaire survey that delivered a 74% response rate amongst residents is set out in the Consultation Statement that accompanies this document.
- 4.5 The adoption of the Vision Statement and subsequent consultation with residents took place against the background of an unprecedented increase in the number of approvals granted for housing development directly affecting Long Itchington village between 2011 and 2016. The scale and pace of this development, logically cannot have

occurred without any impact on life within the Neighbourhood Area. For example, the residents believe they have experienced more traffic using the local road network leading to increased pressure on car parking for local facilities and services; increased number of sewerage system overflows; a reduction in any spare capacity that might exist in local schools; further pressure on the ability of the Community Centre to support local voluntary organisations, essential to help integrate and support all residents, but considered to be already at or near full capacity in 2011.

- 4.6 The policies set out in **Section 5** of this Plan, therefore, are framed to influence the scale of additional, particularly open market, large-scale, housing development during the remaining life of the Plan in order to protect the rural character, natural environment, infrastructure and facilities of the Neighbourhood Area.

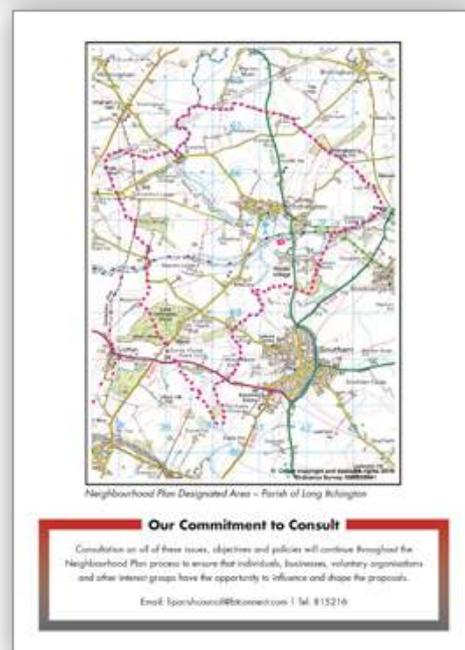

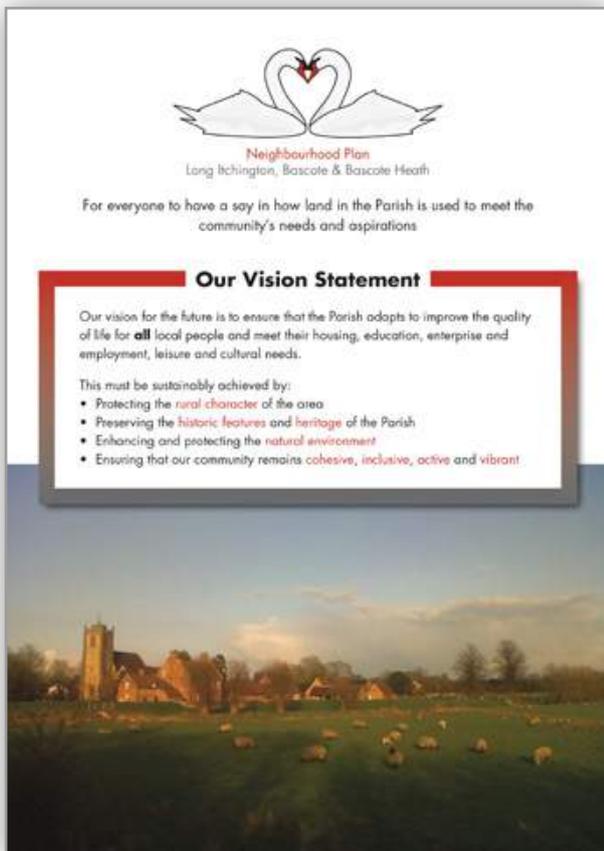

FIGURE 4: Vision statement publication

5. Neighbourhood Plan Policies

A Methodology

- i) All Policies in the Plan should be read together and alongside the Policies of the Core Strategy.
- ii) This section of the Neighbourhood Plan specifies the policies intended to help achieve the aims and objectives broadly identified in the Vision Statement.
- iii) Policies are grouped in themes and arranged as follows:
 - **Housing**
 - **Built Environment**
 - **Employment and Business**
 - **Natural Environment**
 - **Community**
 - **Sport, Leisure and Recreation**
- iv) Each policy is a statement setting out a particular action, objective or aim. It is followed by an explanation of why the policy is made and how it supports the achievement of the aim or objective. Evidence is then cited to support the inclusion and relevance of each policy in the Plan.
- v) Evidence is primarily the results from local consultation as outlined in the Consultation Statement that supports this Plan, particularly the comprehensive questionnaire survey ('QS') undertaken in September/October 2016 with a 74% response rate of residents 16 years and over within the Neighbourhood Area.
- vi) Specific results from the QS are cited to explain and support the reasons why the policies in the Plan have been developed and these charts can be found in Appendix A. The full QS report with a detailed analysis of all responses can be viewed at <https://longitchington.org.uk/wp-content/uploads/2017/07/Neighbourhood-plan-survey-2016-PDF.pdf>.

- vii) Relevant statements and/or policies in Stratford District Council's adopted Core Strategy and the Government's National Planning Policy Framework published in February 2019 (updated June 2019) are also cited.
- viii) Other planning policy and practice or other relevant evidence is cited to support some policies. This has been identified by broader research with sources noted in each case.
- ix) Where appropriate, Neighbourhood Plan policies are supplemented by statements of community aspirations. These indicate how development could meet future needs of the community revealed through local consultation for example in provision of a wide choice of housing types and provision of community facilities.

B Statement of Support for New Housing Development

The policies set out in this section of the Plan establish a position regarding the types of development acceptable to local people and the terms of support for new, small-scale, sustainable housing development during the remaining life of the Core Strategy. This type and scale of development will help to deliver local residents Vision for the Neighbourhood Area and meet their identified needs. This is a crucial, local issue and for ease of reference and clarity the approach is summarised in the following statement. Each element of the statement contains a reference to the relevant policy area throughout the Plan where more detail, explanation and evidence is given. It should be noted that this statement does not apply or seek to restrict the potential 'windfall' redevelopment of the Cemex site referred to in section '3. Cemex Site' overleaf.

C Cemex Site

(Former Cement Works, Long Itchington)

- i) The policies set out in this Plan apply to development on all land within the Neighbourhood Area with the exception of the existing Cemex site. This requires special mention as it is Long Itchington's largest industrial complex comprising areas of quarry extraction and brownfield development. Consultation with Cemex during the preparation of the Plan has revealed the company's long-term expectation that it will seek permission for redevelopment of the brownfield elements of the site (land on which industrial buildings or other operational structures have existed). The company anticipates that this could take the form of mixed development but is likely to be predominantly for housing as it believes that that would be the most financially viable option.
- ii) The company says that the timing of any proposal will depend on the operational needs of the business (factors within the control of the company) and the delivery of housing development land to meet the forecast needs identified in the Core Strategy (factors outside the control of the company).
- iii) Paragraph 5.2.10 of the Core Strategy confirms that redevelopment of large, rural brownfield sites could provide 'windfall' additions to the overall housing supply. Although the Cemex site is identified in Policy AS 11 of the Core Strategy (Site 3) as a potential site for redevelopment it is not included in the forecast housing land supply target up to 2031. In the event of proposed redevelopment, the Policy states that "A comprehensive masterplan must be prepared in conjunction with the owners of the site, local communities and agencies."
- iv) In view of the uncertainty of any timescale, form and scale of redevelopment of the site and the Core Strategy requirement for consultation on any proposal, this Plan does not contain specific policies relating to what would be a strategic development proposal with major implications for the settlements within the Long Itchington Neighbourhood Area across all six policy areas identified above. The community will, therefore, expect to be actively engaged from the outset in the preparation of any masterplan that should include guidance specific to the site on the use, design and scale of any development at the appropriate time. The future development of the site will be revisited in any future revision of this Plan at which time circumstances may have changed.

5.1 Housing

Strategic Objectives:

- To promote the provision of appropriate, high quality housing to meet the needs of all individuals and families in our community;
- To contribute to the target of sustainable new residential development adopted in Stratford District Council's adopted Core Strategy.

Policy H1. Housing within the BUAB

A Built Up Area Boundary (BUAB) is established for the village of Long Itchington as defined in Figure 5. All areas outside the BUAB are classed as Countryside (with the exception of the Cemex site identified as Site 3 in Core Strategy Policy AS11) where new dwellings are strictly controlled in accordance with Policy AS.10 of the Core Strategy.

Proposals for new dwellings within the BUAB, preferably re-using previously developed land, are supported provided they are:

- a) At a small scale and appropriate to their village setting
- b) Compatible with adjacent uses and the immediate surroundings, and
- c) Lead to an enhancement in the character and appearance of the site

Explanation:

- 5.1.1** This policy aims to satisfy the aspiration of local people to protect the rural setting and character of the Neighbourhood Area.
- 5.1.2** Long Itchington village has been categorised as a 'Local Service Village' in the Core Strategy. A built-up area boundary has been established in order to protect against the erosion of its rural setting and character through inappropriate development.
- 5.1.3** Long Itchington Village has, unsurprisingly, seen the greatest growth of all settlements in the Neighbourhood Area. It is known, as a result of a significant number of approaches from land owners and housing developers, that there is continuing commercial pressure to develop housing in the countryside that

adjoins its boundaries. It is therefore vital that this is resisted in order to deliver the aims and aspirations of local people to preserve its historic character as a rural village.

5.1.4 Model Village is a significant, distinct group of dwellings close to the main village centre. Although it has its own character and identity, residents are strongly involved in the wider community as shown by the responses set out in Charts 67 and 68 (page 57) of the QS results. In addition, (as mentioned in Section 3, Paragraph 3.6) the settlement is of historical importance and the integrity of its original design and layout should be protected. It is separated by open fields to the north and west of the A423 road that provides a footpath to link the two areas. There is less separation on the eastern side of the road as a result of an intermittent, narrow ribbon of development that has occurred at various times over many years. This incorporates residential, commercial and public house properties that ends close to the entrance to Model Village. If the open fields to the west of the A423 are developed it would seriously damage the rural settings of both Model Village and Long Itchington village and risk their eventual merging through incremental development along their respective edges.

5.1.5 Identifying a built-up area boundary for Model Village to provide this protection has been considered in the preparation of this Plan. However, following discussion with Stratford District Council, it is not proposed for the following reasons:

- a. the settlement is not included in the Local Service Village categorisation of Long Itchington village and development would, therefore, be deemed to be unsustainable;
- b. development between the existing boundary of Model Village and other settlements would be contrary to Core Strategy and national planning policies against development in open countryside and those intended to protect against coalescence between existing settlements; and
- c. that a band of open countryside immediately to the north of Model village framed by the man-made disused railway line (now part of the Sustrans network) and the canal provides a strong barrier to ensure that coalescence will

not occur. This is in addition to the area of open countryside that lies between this landscape band and the Long Itchington village built-up area boundary that comprises agricultural land, woodland and flood plane for the River Itchen. Together, these areas provide an important element of the rural setting and character of the area and also offer landscapes and views valued by local people (see Section 5.4, Policy NE1 of this Plan).

- 5.1.6** No built-up area boundaries have been established for other settlements within the Neighbourhood Area, Bascote and Bascote Heath, as, like Model Village, they fall within the “Countryside” classification identified in this Policy and the Core Strategy. They are clearly hamlets geographically separated from Long Itchington village.
- 5.1.7** As a principle, no development other than that specified in the policy will be supported in order to preserve green space between existing settlements and avoid merging of separate settlements..
- 5.1.8** The Core Strategy identifies Long Itchington as a Category 1 Local Service Village. The approach adopted in the plan for dispersal of new development throughout the district required to meet the need for new housing indicates that Long Itchington’s share of new dwellings should be no more than around 113 over the plan period between 2011 and 2031. This is to ensure that the scale of new development is sustainable and does not prejudice the character of the settlement. Sustainable development is a key principle enshrined in the National Planning Policy Framework 2021.
- 5.1.9** Planning permission has been granted for a total of 312 residential units in Long Itchington Neighbourhood Area. since the commencement of the Core Strategy plan period in 2011. The table in Figure 3b identifies the location of these new dwellings. All are completed or under construction. This is 186 units more than the Core Strategy allocation and represents 264% of the sustainable share envisaged after only 8 years of the 20 years Core Strategy period. An alternative expression of this situation is that 66% of the total number of new houses envisaged for all Category 1 Local Service Villages has been constructed in or on the

edge of Long Itchington village. This equates to a 32% increase approximately in the number of dwellings located in Long Itchington village during this period.

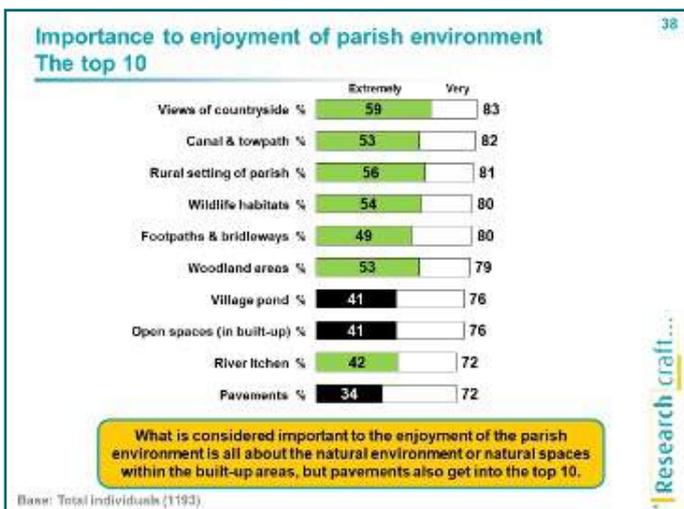

- 5.1.10** This Plan supports incremental growth through new, small-scale development to meet local housing need and contribute to the maintenance of a healthy community. It does not, however, support continued large-scale development that risks prejudicing the character and rural setting of the Neighbourhood Area and placing greater pressure on existing local infrastructure including transport, education, health, other services and the environment.
- 5.1.11** On this basis, it is not considered necessary or desirable to allocate any specific sites within the Neighbourhood Area for future residential development and no further large-scale market housing developments will be supported during the lifetime of the Plan. This policy is consistent with Core strategy Policy AS.10 and does not seek to limit other types of development considered to be acceptable, in principle, within the countryside and villages. This Plan will, however, be reviewed after its formal adoption when the situation will be reassessed supported by a new Housing Needs Survey.

Evidence:

- 5.1.12** Section 5.1 of the CS – Distribution of Development identifies Long Itchington as a category 1 Local Service Village (Para. 5.1.10).
- 5.1.13** Policy CS16 of the CS specifies the formula for distribution of new housing development across the District to sustainably deliver the total requirement between 2011 and 2031.
- 5.1.14** A strategic allocation of 450 new homes for all Category 1 Local Service Villages is identified “... of which no more than around 25% should be provided in any individual settlement.”
- 5.1.15** Applying this formula results in the figure of approximately 113 units identified in Explanation 3 above.
- 5.1.16** Policy CS.16 in the adopted Core Strategy establishes the principle of using Built-Up Area Boundaries (BUABs) as a mechanism for managing the location of development and

that it is appropriate to define BUABs for Local Service Villages to coincide with the physical confines of these settlements as the two are meant to be interchangeable in accordance with Part D in Policy CS. 16. The BUAB defined for Long Itchington is derived from the methodology and boundary used in the 2020 draft Stratford on Avon Site Allocations Plan.

5.1.17 Charts 38 and 39 of the QS results (pages 51 and 52) show the importance respondents place on the natural features surrounding existing settlements in the Neighbourhood Area that contribute to their enjoyment of living here. A specific example is that 81% of respondents considered the rural setting of the Neighbourhood Area to be “extremely” or “very” important to their enjoyment of the Neighbourhood Area environment (Chart 38, page 51).

Questionnaire Survey - Chart 38

Policy H2 – Housing Stock Diversity

- Development proposals should retain and/or add to the choice of type and tenure of housing, including bungalows, self-build, custom-build and live/work units.
- Developers of new housing are encouraged to build sustainable and flexible living into house design to meet the requirements of people throughout their lives. In particular, accommodation should be easily adaptable to suit changing household needs and circumstances, including to cater for home working, people with disabilities and older residents who may need care and support.
- Single storey living and/or accessible dwellings with a predominance of ground floor accommodation would be supported where an evidenced local need is identified.

Explanation:

5.1.18 This policy is intended to encourage and support the widest choice of housing and living accommodation in the local housing stock. This might include sheltered accommodation or adapted housing (for example, smaller units to enable ‘down-sizing’, sheltered or care accommodation) across a range of tenures. Self-build and custom-build plots to meet local demand would also be encouraged and supported under this policy. This approach would provide opportunities for local people to move to housing that meets their changing needs but remain within the community, close to family, friends and their established support services. A more detailed statement about the community’s aspirations for life-long housing choice is set out at the end of this section.

5.1.19 Adoption of the optional Part M4(2) (Accessible and Adaptable Dwellings) of the Building Regulations 2015 (as amended) for all new dwellings would satisfy the requirement of part B of this Policy to provide houses flexible enough to meet the changing needs of residents over time.

5.1.20 Live/work housing is defined as residential accommodation designed or adapted to meet the needs of occupiers working from home either as remote employees or running their own businesses provided that the use is appropriate to residential areas and causes no adverse environmental harm or effects on the environment or use of neighbouring properties.

5.1.21 This policy also addresses concerns expressed by local people about the loss of bungalow or single storey dwellings through conversion to multi-storey family housing. Where this occurs, it has the effect of reducing the choice of housing types within the total stock of dwellings.

5.1.22 A significant number of local people in the Neighbourhood Area are aged 60 or over (see Evidence cited below). Also, a significant number of respondents to the Questionnaire Survey stated that they have lived in the Neighbourhood Area for more than 25 years. It is, therefore, contended that demand for single storey living is likely to be high. This is supported by anecdotal evidence of demand for this type of accommodation and comments made in response to the Housing Needs Survey 2016.

5.1.23 This demographic evidence for the Neighbourhood Area makes the case for supporting greater diversity in the local housing stock to cater for the future needs of local people and maintain established family and social networks. An important element is access to single storey living and the existing stock of bungalows should therefore be protected from any further conversion to multi-level dwellings..

Evidence:

5.1.24 Chart 13 of the QS results (page 54) confirms that 25% of residents are 60 or over. Chart 15 (page 54) confirms that 33% of all residents have lived in the Neighbourhood Area for over 25 years.

5.1.25 Policy CS.19 of Stratford District's Core Strategy (paragraph 5.5.8) states - "Stratford-on-Avon District is also expected to have an ageing population (both in terms of increasing number and as a proportion of the population). Paragraph 1.2.11 of the Core Strategy identifies that a significant factor in the District is the higher average age of the population compared

with the national average. 52% of residents are over 45 (England = 42%) and 22% are over 65 (England = 16.3%) (Source: Census 2011). Additionally, the proportion of local residents aged 85 or over is forecast to more than double by 2031. Long Itchington is, therefore, projected to have an even larger proportion of residents aged over 60 than Stratford-on-Avon District.

5.1.26 The Neighbourhood Housing Needs Survey 2016 <https://longitchington.org.uk/wp-content/uploads/2022/10/Housing-Needs-Survey-October-2016.pdf> contains specific comments from respondents about the need for bungalow accommodation. The survey results revealed a need for 28 new homes in the Neighbourhood Area for households with a local connection – of these 9 were specifically requested to be bungalows – that equates to the demand for bungalows representing 32% of the identified need.

5.1.27 Chart 17 of the QS results (page 54) confirmed that at the time of the survey 14% of respondents lived in bungalows. However, this was undertaken before the three new large housing developments were approved.

5.1.28 Age UK says bungalows should be one of a "range of options" but they must be close to amenities like shops and public transport.

5.1.29 There have recently been two planning applications to convert existing bungalows to houses/upper level dwellings which have secured planning approval. Such conversions further reduce the number and mix of bungalows in our community.

5.1.30 Policy CS.19 of Stratford District's Core Strategy states that "Bungalows are a consistently popular option, especially for older people wishing to maintain their independence. Their provision can in some cases help create vacancies in existing larger houses perhaps more suitable for occupation by families."

5.1.31 There is a direct correlation between the higher than average, and extending, age profile across our community with the higher than National and District average demand for bungalows in the Neighbourhood Area. At the same time the chance of meeting this demand has been

significantly reduced by new housing developers failing to construct sufficient new bungalows and from individuals converting existing bungalows to multi-storey dwellings. The current stock of bungalows within our Neighbourhood has now fallen to approximately 11.7% of total local housing stock against a rising demand for bungalows of approximately 14.5% across our community.

Policy H3 – Affordable Housing

Development proposals for the provision of small-scale affordable housing (as defined in Core Strategy Policy CS.18) are supported either within the BUAB or as a Local Needs Scheme adjacent to the BUAB when the identified needs of the local community are being addressed. Where appropriate, housing tenures will be secured in perpetuity through a legal agreement.

Explanation:

5.132 This policy acknowledges that Long Itchington Neighbourhood Area is an area of relatively high house prices. Accordingly, some individuals or households with long family connections to the area will be unable to afford to buy open market housing if they want, or have a need to maintain close, local family or community links.

5.133 The Long Itchington Housing Needs Survey of 2016 as part of the development of this Plan identifies certain housing need that has been potentially satisfied by recent, new housing in the Neighbourhood Area. However, it is acknowledged that actual housing need changes over time and it is expected that further Housing Need Surveys will be undertaken during the life of this Plan. Policies therefore should be able to address changing needs in the future. <https://longitchington.org.uk/wp-content/uploads/2022/10/Housing-Needs-Survey-October-2016.pdf>

5.134 New housing should provide at least 35% of the total number of units for affordable housing in accordance with the threshold set out in Policy CS18 of the Core Strategy.

5.135 When affordable housing is provided, ownership/occupation should be first

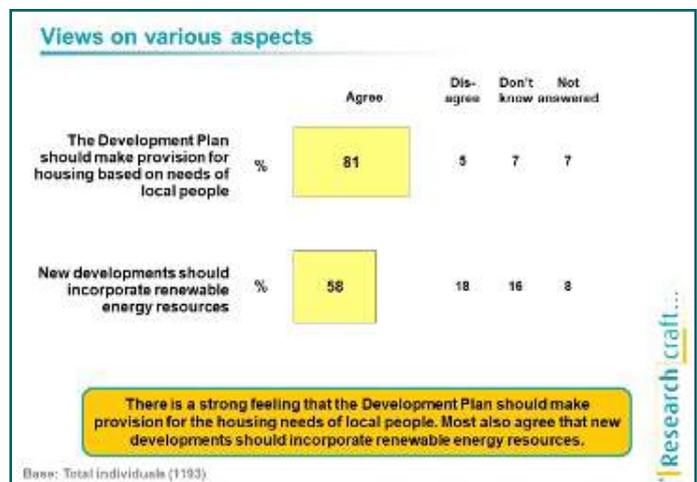

restricted to people with local connections and only then through a wider allocations scheme operating in Stratford District.

Evidence:

5.136 A Further Housing Needs Survey was undertaken in 2022 <https://longitchington.org.uk/wp-content/uploads/2022/10/Longlth-HNS-report-July2022.pdf>.

These may provide evidence in support of a Local Needs Scheme as provided for in the Core Strategy Policy CS. 15, or other local initiative.

5.137 Chart 54 of the QS results (see below) shows that 81% of respondents consider that provision should be made for housing provision based on the needs of local people.

Questionnaire Survey - Chart 54

Policy H4 – Development on Private Garden Land

Development proposals for housing on private garden land within the BUAB will be supported providing it can be demonstrated that the proposal:

- preserves or enhances the character of the setting, with particular attention to context if the site is within the Long Itchington Village Conservation Area;
- achieves a good fit with the existing settlement pattern
- addresses and remedies any potential harm to the amenity of the host dwelling and neighbouring properties; and
- provides satisfactory arrangements for access and off-road parking

Explanation:

- 5.1.38 This policy acknowledges that, in some circumstances, the size of large private gardens can be a liability to their owners and that development for new housing can be an option provided that proposals are handled sensitively.
- 5.1.39 The criteria set out in the policy are intended to ensure that any new dwelling provides satisfactory facilities and would not adversely affect the character of the surrounding environment or people’s enjoyment of existing properties including the original dwelling on the site.
- 5.1.40 The policy recognises the potential benefit of windfall residential development, including the release of potential self-build plots to help meet Stratford District’s housing land supply target identified in the Core Strategy.

Community Aspiration:

Access to a Range of Housing and a Sustainable Community

Policy H2 of this plan discusses the demographic profile of the Neighbourhood Area and makes the case for access to a wide range of housing to ensure that choices are available for local people at various stages of their lives. This includes housing suitable and affordable for young people and families as well as for older people.

Local evidence indicates a growing older population generally in common with the nation as a whole, but the evidence cited in paragraph 1 of the Evidence section to Policy H2 also shows a substantial proportion (33%) of residents who

have lived in the Neighbourhood Area for more than 25 years. The implication of this is that most will have established deep roots within the local community with crucial networks of family, friends and other support services. Equally important to the community as a whole is the retention of local people who in many instances have helped create a strong and vibrant community and engaged with its life making the Neighbourhood Area socially cohesive and sustainable.

Local choice of different types and tenures of housing to enable, for example, downsizing, a move to single storey or adapted living, sheltered or care accommodation is essential to provide the best opportunity for residents to remain within their community. This plan therefore seeks to encourage and support the provision of a wide range of housing types to meet the identified needs of local people subject always to new provision meeting all relevant policies concerned with the location, design, scale and form of new development.

Proposals that support achieving the goal of wider choice should be supported in preference to proposals that simply add to the stock of general, open market housing for sale.

In response to the wishes of local people expressed in the QS, the Plan seeks to be flexible about provision of small-scale housing development, particularly where it meets an identified local need for access to a wide range of housing type and tenure whilst resisting development of further large- scale commercial housing estates in adjoining countryside.

Evidence:

- 5.1.41 Chart 55 of the QS results (page 56) shows that 58% of respondents consider that infill development is appropriate for new housing.
- 5.1.42 Paragraph 5.2.12 of the CS confirms the value of ‘windfall’ homes to meeting the overall District target for new housing units.
- 5.1.43 Two appropriate and successful examples of infill development were provided by Chater’s Orchard and infill on the former garden of Lyndhurst (the Birches) – Short Lane.

5.2 The Built Environment

Strategic Objectives:

To preserve the character and distinctiveness of the Neighbourhood Area as a group of small rural settlements with the village of Long Itchington at its centre and to protect it from inappropriate or unsympathetic development that would detract from this.

- To ensure the design and construction of any new development reflects the distinctive characteristics of buildings and structures that combine to give the Neighbourhood Area its unique appearance and appeal to local people.

Policy BE1 Design Standards

Development proposals must demonstrate that their scale, form, layout and design are consistent with and sympathetically reflect the rural setting of the Neighbourhood Area. The architectural character and distinctiveness of buildings and structures should be the inspiration for new buildings. Innovative design proposals will be supported providing that they add to and do not detract from the distinctive character of their location. Further guidance is available in the Village Design Statement (for Long Itchington) and Part A 'How to Achieve Good Design' of Stratford-on-Avon's Development Requirements Supplementary Planning Document.

In particular, proposals should be prepared against each of the following key recommendations (also contained in the Village Design Statement 2000):

- a) Maintain the open, rural character of settlements by protecting all existing open spaces including green verges forming part of the adopted highway within the BUAB;
- b) The characteristics of new buildings should reflect the scale and form of the settlement;
- c) Tree planting and landscaping must be an integral part of the design and construction of
- d) Healthy, mature, native trees and hedges must be protected and supplemented by new planting of indigenous species;
- e) Integration of any new development should be strengthened by connections to existing footpaths and cycleways where appropriate;
- f) Adequate, off-road parking should be incorporated in accordance with Part O of the adopted Development Requirements SPD. Depending on the location of the development site, its relationship with neighbouring properties and the extent of existing on-street parking, additional parking provision may be appropriate. Vehicle parking should be screened from public view as far as is practicable; large expanses of hard surfacing should be avoided.
- g) All new dwellings should incorporate cycle storage wherever practicable in order to promote sustainable transport.
- h) Design features should be incorporated to protect and enhance wildlife corridors within and between the sites of buildings, green spaces and, where applicable, the adjoining countryside.

Explanation:

5.21 Consultation with local people strongly identified the importance of any development reflecting the character of the Neighbourhood Area that is seen as rural.

5.22 Proposed developments whose scale, form, layout and design of buildings, infrastructure, public spaces and landscaping do not preserve and protect the characteristics of rural settlements within the Neighbourhood Area would be unsustainable, inappropriate or unsympathetic and will not be supported. This policy seeks to ensure that the overwhelming view of local people that the Neighbourhood Area should be protected from what is perceived as a migration to an urban environment is respected and achieved.

5.23 The Village Design Statement was the product of a major community led project

any development;

that encapsulated the unique character and features of Long Itchington village. It was adopted in 2000 by Stratford District Council as supplementary planning guidance and remains relevant today and for the future as a reference document to help protect the assets and environmental characteristics that the community continues to value in its determination to protect the historic and rural character of the area. The Village Design Statement can be viewed at <https://longitchington.org.uk/policies-and-documents/village-design-statement/>

5.24 Long Itchington Village has grown significantly since its early beginnings (see Section 3. The Origins and Growth of the Long Itchington Neighbourhood Area and Figures 3 and 3a for background and details). There is, therefore, no single design character that applies to the whole of Long Itchington village or, indeed, the

whole Neighbourhood Area. The Village Design Statement identified five zones of development each with its own distinctive design characteristics that are mainly the product of housing development over many years. These zones are shown on the map in Figure 6. The Village Design Statement describes the architectural character and historical context of each zone and also provides design recommendations for the design of industrial, commercial and public buildings as well as open spaces located throughout the village. This policy envisages that the design of any proposed development should have regard to the recommendations that relate to the characteristics of the area in which it is located.

5.25 Development proposals should also be assessed against the principles set out in the Built for Life 12 (BfL12) checklist to ensure it is sympathetic to the character of the area, effectively integrated, and environmentally sustainable. This standard is set out in full at <http://builtforlifelifehomes.org> and is consistent with the good design standards set out in **Section 12 (Achieving Well Designed Places)** of the National Planning Policy Framework as revised in 2021

5.26 Current design guidance for Stratford on Avon District is provided by Part A, 'How to Achieve Good Design' of Stratford on Avon's Development Requirements Supplementary Planning Document 2018.

Evidence:

5.27 Chart 56 of the QS results (page 57) shows the following support levels from respondents for the key Village Design Statement as either "Extremely" or "Very" important:

The following are the scores for each of the recommendations **(a)** to **(g)** set out in the policy above:

- a)** 84% (Maintain rural character of settlements)
- b)** 75% (New development to reflect scale and form of existing buildings)
- c)** 84% (Landscaping - an integral part of design)
- d)** 81% (Existing trees protected and supplemented)
- e)** 75% (Integrate new development with footpaths and cycleways)
- f)** 80% (Provide adequate parking)
- g)** 74% (Avoid large expanses of hard surfacing)

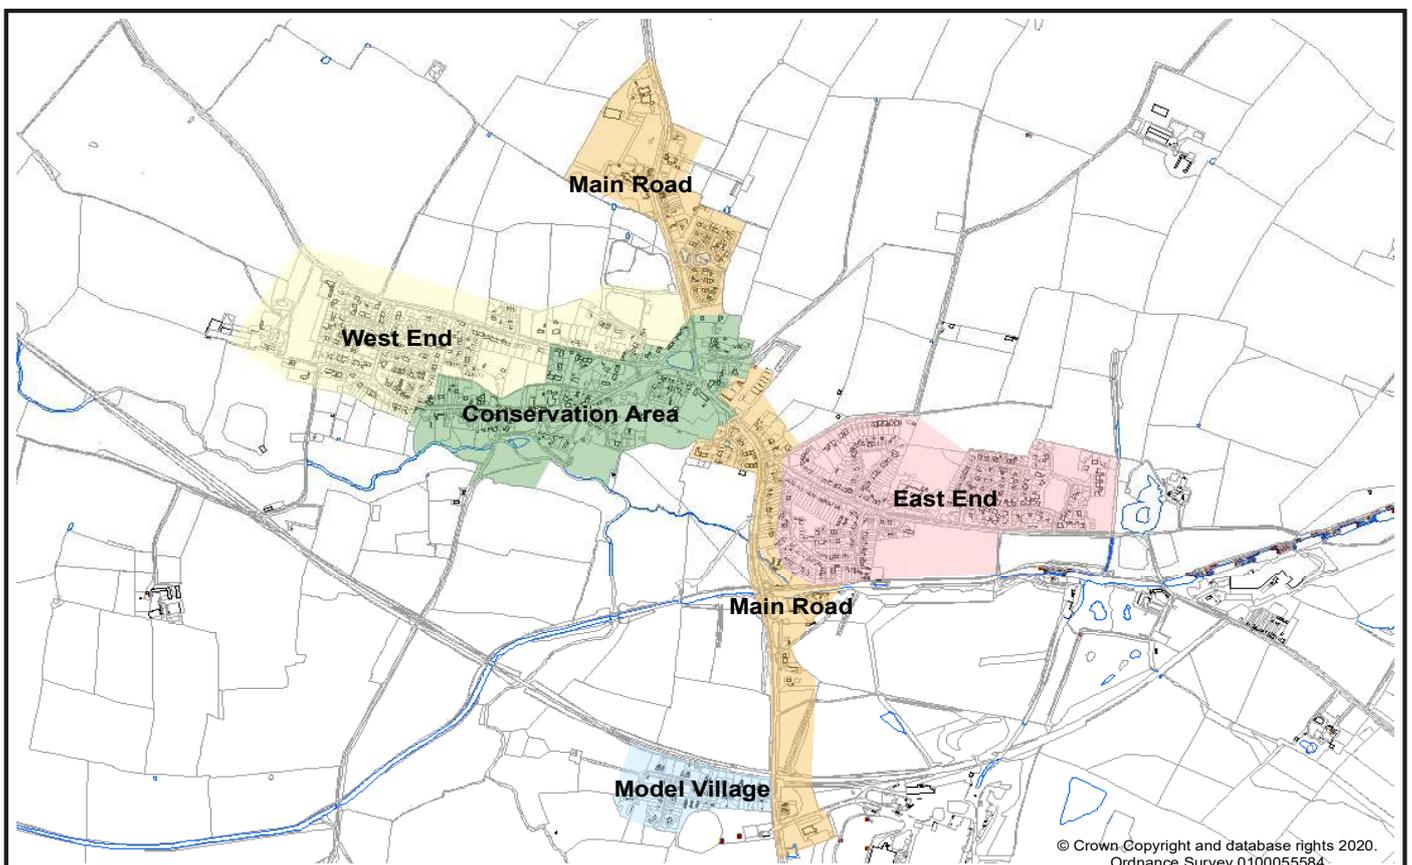

FIGURE 6: Village Design Statement 2000 - Five Development Zones

BE2 Conservation of Heritage Assets

Development proposals that affect a heritage asset (whether or not designated) and/or its setting, an archaeological asset or the Long Itchington Village Conservation Area must assess and address their impacts and any mitigation in accordance with NPPF requirements. Proposals should demonstrate how they will conserve or enhance the historic environment.

Proposals, including changes of use, that enable the appropriate and sensitive restoration or conservation of heritage assets will be supported in principle.

Explanation:

52.8 The Listed Buildings and structures located throughout the Neighbourhood Area (identified on the map in Figures 2a and 2b) are key heritage features that help to give the area its strong and distinctive character. Consultation with local people has revealed the importance of protecting and enhancing these assets for future generations as well as for current enjoyment. This policy, therefore, seeks to meet this requirement.

52.9 Local people have also made it clear that the Long Itchington Conservation Area should be protected from inappropriate development that would risk damaging its character and distinctive environmental qualities.

Evidence:

52.10 Chart 40 of the QS results (page 56) shows that 41% of respondents consider historic buildings to be “Extremely” or “Very” important to their enjoyment of the Neighbourhood Area environment.

52.11 Historic buildings and the environment of the Long Itchington Village Conservation Area contribute significantly to the character and local distinctiveness of the Neighbourhood Area that is to be reinforced in accordance with Objective 1 of section 3.8 of the CS.

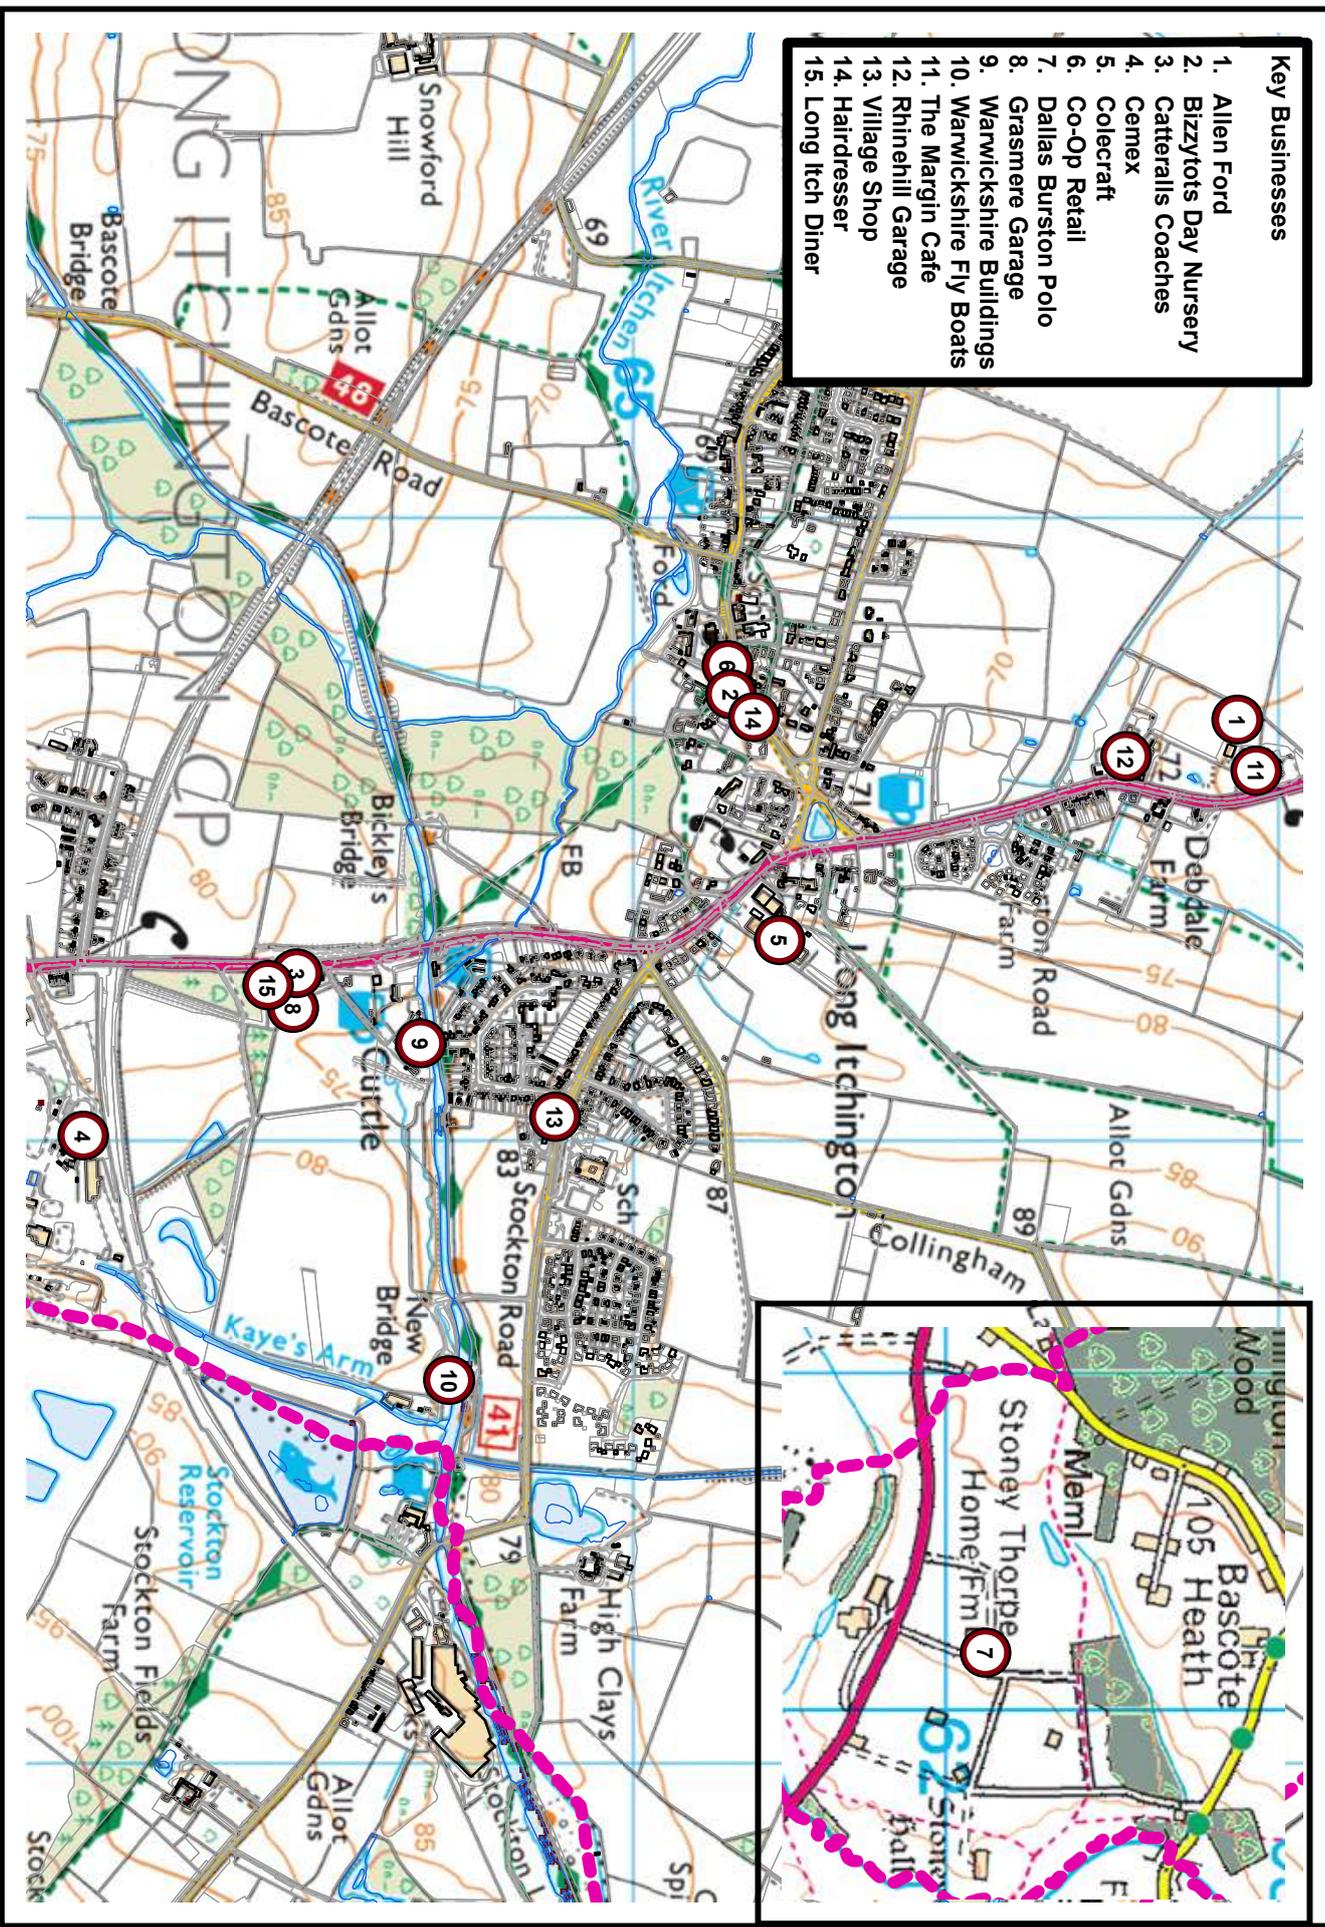

FIGURE 7: Key Business Location map

5.3 Employment and Business Strategic Objectives:

- To support and encourage thriving, environmentally sustainable businesses that are in harmony with the rural character and setting of the Neighbourhood Area;
- To promote the creation of employment opportunities in the Neighbourhood Area for local people including home-based enterprise; and
- To encourage the most effective use of land and buildings to meet the changing needs of enterprise and business.

Policy EB1 Business Uses

Development proposals for new business uses appropriate to their location and within the BUAB, or the expansion or redevelopment of existing business sites that will lead to local employment opportunities, are supported in principle providing that their design and impact at their location are assessed and addressed, with mitigation where appropriate.

If a change of use is proposed on the basis that an employment site is no longer suitable for any employment/business use, it should be accompanied by a detailed analysis of the reasons why it is unsuitable and evidence of a minimum of 6 months active marketing to attempt to secure a new business occupier on reasonable open market terms. A proposal for an alternative use of part of a site will be supported where it is demonstrated that sustainable economic viability for the retained business or growth of local employment opportunities would be achieved.

Explanation:

- 5.3.1** New development for business use or redevelopment of existing business sites that secures existing jobs or creates new jobs for local people would help to meet the strategic objectives of this section of the Plan.
- 5.3.2** Successful businesses are an essential part of our community and support many aspects of

local life in addition to providing employment opportunities. This policy seeks to encourage development and use of land and buildings to meet the needs of business and enterprise subject to the demand of local people that the rural setting and character of the Neighbourhood Area is protected.

- 5.3.3** Figure 7 identifies the locations of existing key businesses

Evidence:

- 5.3.4** Policy CS.22 of the Core Strategy states that: "An existing employment site should not be redeveloped or converted to non-employment uses unless it is no longer viable or appropriate for business purpose. This policy is consistent with Policy CS.24 of the Core Strategy in its objective to promote tourism development that is "... sensitive to the character of the area and designed to maximise the benefits for the communities affected in terms of job opportunities and support for local services." Paragraph 5.10.11 states that "Tourism is a vital component of the District's economy as it supports hospitality, catering, accommodation retail and business."
- 5.3.5** Chart 58 of the QS results (page 57) shows that 63% of respondents agreed that the Plan should make provision for employment opportunities. 46% of respondents agreed that employment sites should be protected from change of use.

Policy EB2 – Tourism

Development proposals that encourage or support the growth of the local economy from tourism are supported in principle providing that their design and impact at their location are assessed and addressed, with mitigation where appropriate.

Explanation:

- 5.3.6** The Neighbourhood Area is an attractive place for people to visit with a range of assets including public footpaths, Sustrans cycleway, towpath and bridleway network providing public access to countryside, pubs and restaurants, an important section of canal used for leisure cruising, camping facilities and

holiday accommodation, horse riding livery stables and an international Polo Ground.

Key tourism related assets and businesses are identified on the map in **Figure 8a** and listed in the table in **Figure 8b**.

These assets support a vibrant local economy. This policy, therefore, seeks to encourage the

appropriate and sustainable development of tourism assets in the Neighbourhood Area.

5.3.7 A thriving tourism sector of the economy will help to maintain and promote local employment opportunities and support services also available for local people.

- 27. Long Itchington Tennis Club

FIGURE 8b: Table of Tourism Assets

(The number corresponds to the location identified on the map in Figure 8a)

5.4 The Natural Environment

- To enhance and protect the distinctive rural character and settings of the settlements in the Neighbourhood Area.
- To encourage environmental sustainability through efficient use of natural resources.
- To encourage and protect biodiversity in all areas of the Neighbourhood Area.
- To contribute to the environmental aims and objectives following from Stratford on Avon Council's declaration of a Climate Emergency in July 2019, particularly to secure environmentally sustainable development.

Policy NE1 – Valued Landscapes and Views

Development proposals must demonstrate how they are appropriate to and integrate with their landscape setting including locally significant features where appropriate.

Development proposals should assess and address their potential impact on the important views of the landscapes shown on the map in Figure 9, particularly to minimise harms to heritage assets, village approaches and the green spaces around and between settlements.

Explanation:

- 5.4.1** The distinctive character and rural setting of the settlements in the Neighbourhood Area fundamentally relies on their physical relationship with surrounding countryside.
- 5.4.2** Consultation with local people underlined the importance placed on the proximity of open countryside to life within the built environment of each settlement.
- 5.4.3** Views of open countryside from within the built environment of each settlement are important and highly valued because they help to bring it close to the heart of the settlement and reinforce the relationship with the rural environment. They add to the sense of wellbeing and health of local residents

and visitors. Views of each settlement from highways, public footpaths in the countryside and other public access vantage points similarly reinforce their rural settings.

- 5.4.4** The key views identified in **Figure 9** are described as follows. A selection of illustrative photographs taken from each view point are included.

Evidence:

- 5.4.5** Chart 38 of the QS results (page 55) shows that 83% of respondents consider that views of the countryside are “Extremely” or “Very” important to their enjoyment of the Neighbourhood Area environment. This is the most important local feature for residents.

- 5.4.6** Paragraph 174(a) of the National Planning Policy Framework 2021 states that planning policies and decisions should contribute to and enhance the natural and local environment by “...protecting and enhancing valued landscapes...”

- 5.4.7** Evidence from the Stratford upon Avon Landscape Sensitivity Assessment for Villages (2012) is relevant here (Ref: White Consultants 2012)

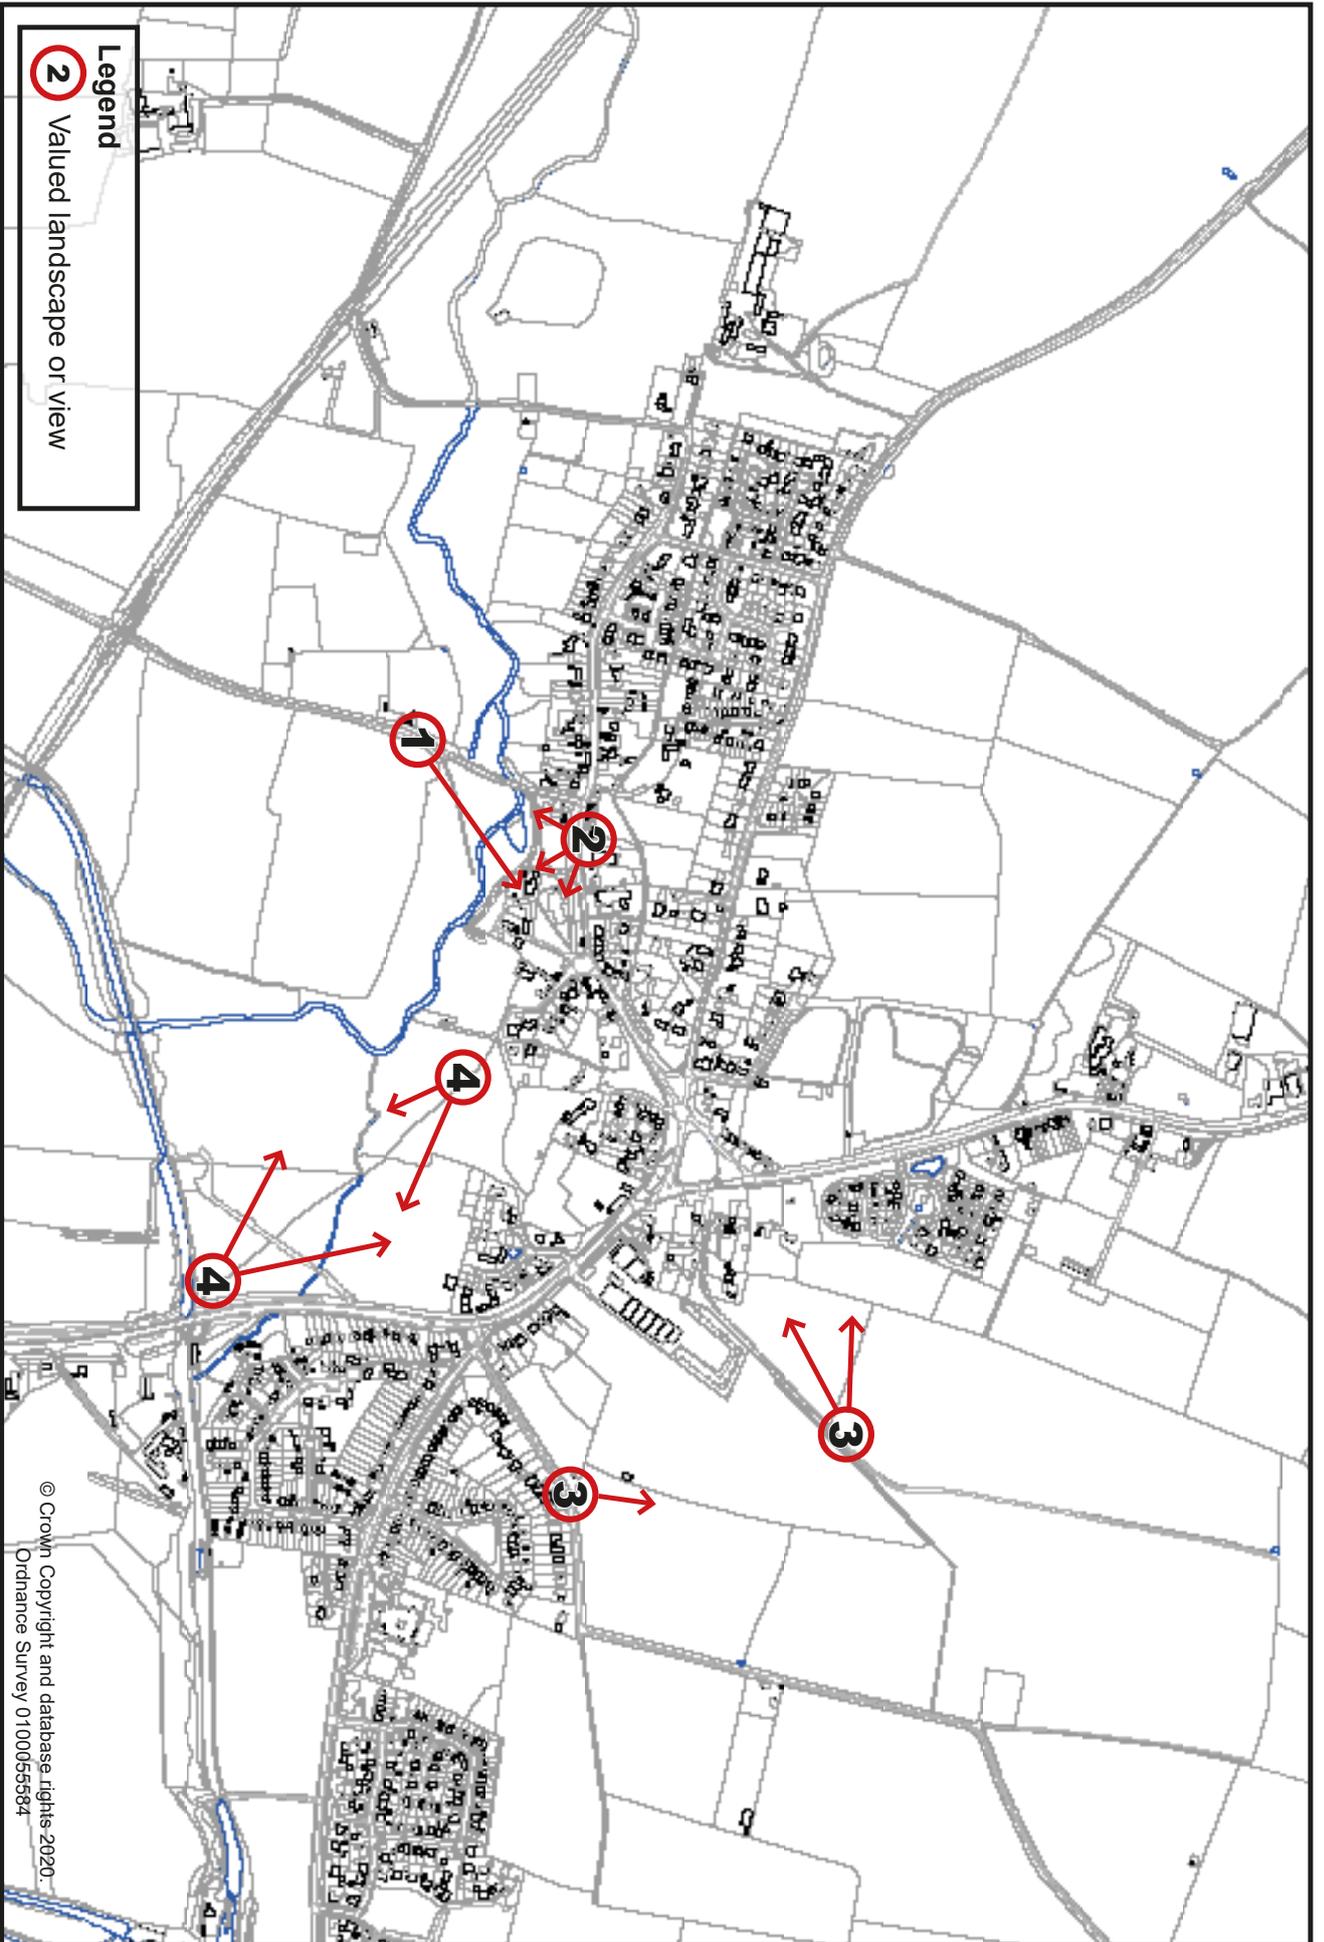

FIGURE 9: Valued Landscapes and Views map

1. Views from various points along Bascote Road looking towards the church

Views eastwards from this point are over the course of the River Itchen including valuable wildlife habitats and open countryside. The views are over land that establish the rural setting and define the built-up area boundary to the south of Church Road. They link to the views described in (7) below.

2. Views from Church Road looking out of the village towards Bascote

The view from Church Road and the Co Op car park across private amenity grassland towards the River Itchen and beyond to rising, open countryside and agricultural land. The view from this location takes in the important rural setting of the Grade II Listed Holy Trinity Church and Manor Farm. This is a key view that emphasises the rural setting of the village and brings the countryside into the heart of the settlement.

3. View from SM9/9a and Collingham Lane

Views from rising ground to the north east of the village along footpath SM9/9a and Collingham Lane across agricultural land. These areas are important 'fingers' of open countryside that project towards the centre of Long Itchington village between residential and industrial development. They protect the rural setting of the settlement and limit the mass of continuous development that would destroy the village character highly valued by local people.

4. Views from SM3

These views radiating from public footpath SM3 are across open, undulating countryside incorporating pastureland and commercial woodland. The landscape defines the limit of the built-up area to the south of Long Itchington village and to the west of Southam Road. The landscape forms part of the important open countryside that separates Model Village from Long Itchington village and maintains the rural setting and character of each settlement.

Policy NE2 – Local Green Spaces

The following areas are designated as Local Green Spaces; these are identified on the map in **Figure 10**.

- a) LGS 1: Allotment Gardens and Cemetery.
- b) LGS 2: Model Village open green space and cricket ground
- c) LGS 3: Communal green space, Beechcroft south of The Green,
- d) LGS 4: The Green and Village Pond
- e) LGS 5: Green End recreation ground and playground,
- f) LGS 6: LILAC Field,

Development on these Spaces will not be supported other than in very special circumstances.

Explanation:

5.48 Each area of Local Green Space listed in the policy is identified on plans included in the independent assessments set out in Appendix C to this Plan.

5.49 Each designated space meets the requirements of Paragraph 102 of the National Planning Policy Framework:

- a) All sites are in close proximity to the community they serve;
- b) All sites contribute to the distribution of green spaces throughout the built-up area that is demonstrably important to local people as evidenced by the results of the Questionnaire Survey;
- c) All the sites are local and not extensive tracts of land. In addition, none of the sites preclude planning for future sustainable development and all are capable of enduring beyond the life of the Plan.

5.4.10 This policy is consistent with and supports the objectives of Core Strategy Policy CS.7.

5.4.11 The wide distribution of village greens and other open amenity land throughout the Neighbourhood

Area is a key feature of the character and distinctiveness of the area.

Evidence:

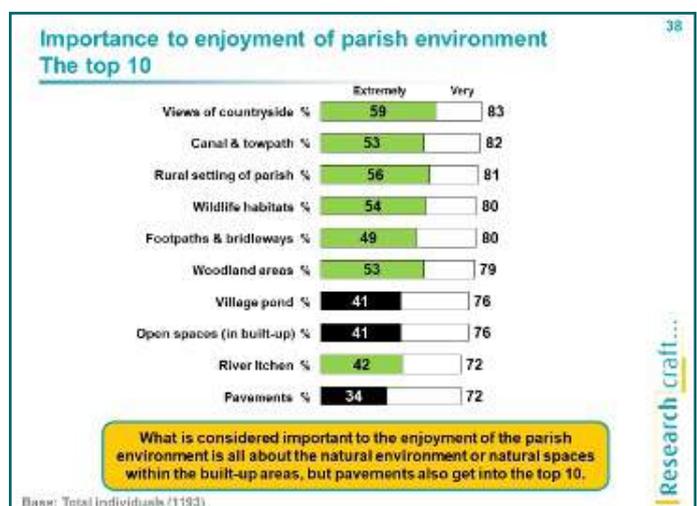

5.4.12 Each area identified in this Policy has been independently assessed and recognised as meeting the NPPF paragraph 102 criteria. In addition, none of the sites preclude planning for future sustainable development and are all capable of enduring beyond the life of the Plan.

5.4.13 Chart 38 of the QS results (see below) shows that 76% of respondents consider that open spaces within built up areas are “Extremely” or “Very” important to their enjoyment of the Neighbourhood Area environment.

5.4.14 Policy CS.7 of the Core Strategy states that: “The availability of open spaces, waterways and other green infrastructure will be maintained and improved as a contribution towards:

- 1. Quality of life and attractive communities;
- 2. Biodiversity and the provision of habitats;
- 3. Landscape character and quality.”

5.4.15 The Houses of Parliament POSTnote 538 published in October 2016 entitled ‘Green Space and Health’ contends that “Local green spaces may provide important areas for social interaction and integration that can indirectly increase public wellbeing. Access to green spaces may also have more direct and immediate benefits for mental health and wellbeing”. It is, therefore, important that local green spaces are protected and wherever possible enhanced.

Questionnaire Survey - Chart 38

Policy NE3 - Incidental Green Spaces

The following areas are designated as Incidental Green Spaces which are open areas considered vital to the rural and green character of the community in which they are situated:

- a) IGS 1 – Dale Close estate, play area and open green space
- b) IGS 2 - Green area south of Galanos / east of Sabin Close
- c) IGS3 – Open green space south of Church Road
- d) IGS4 – Green and ponds at Bishop Drive and Cox Crescent
- e) IGS5 – Playground and open green space west of Leigh Crescent
- f) IGS6 – Green space southwest of Leigh Crescent

- g) IGS 7 -Cluster of incidental green communal spaces and verges from the junction of Collingham Lane and Stockton Road to Leigh Crescent
- h) IGS 8 – Green space Wulfstan Drive
- i) IGS9 – Keepers Meadow green spaces
- j) IGS 10 – Spinney Fields green spaces

These spaces and their cumulative effect are of particular value in areas where dwellings do not provide garden space. Inclusion of incidental green space is vital to all new housing proposals, at a scale appropriate to the size of the site. Development proposals must demonstrate, dependent on their scale, use and location, how they are maintaining, enhancing and adding Incidental Green Spaces.

Explanation:

5.4.16 Each area of Incidental Green Space listed in the Policy, recognised as an important feature in a village setting, is identified on plans included in the independent assessments set out in Appendix C to this Plan.

Evidence:

5.4.17 Each area identified in this policy has been independently assessed and recognised as contributing significantly to the character of the Neighbourhood Area.

5.4.18 Chart 38 of the QS results (page 53) shows that 76% of respondents consider that open spaces within built up areas are 'Extremely' or 'Very' important to their enjoyment of the Neighbourhood Area environment.

5.4.19 The Houses of Parliament POSTnote 538

published in October 2016 entitled 'Green Space and Health' contends that 'Local green spaces may provide important areas of social interaction and integration ... and ... may also have more immediate benefits for mental health and well-being'.

5.4.20 Policy CS.7 of the Core Strategy states that:- "The availability of open spaces, waterways and other green infrastructure features will be maintained and improved as a contribution towards:

- quality of life and attractive communities
- biodiversity and provision of habitats
- landscape character and quality

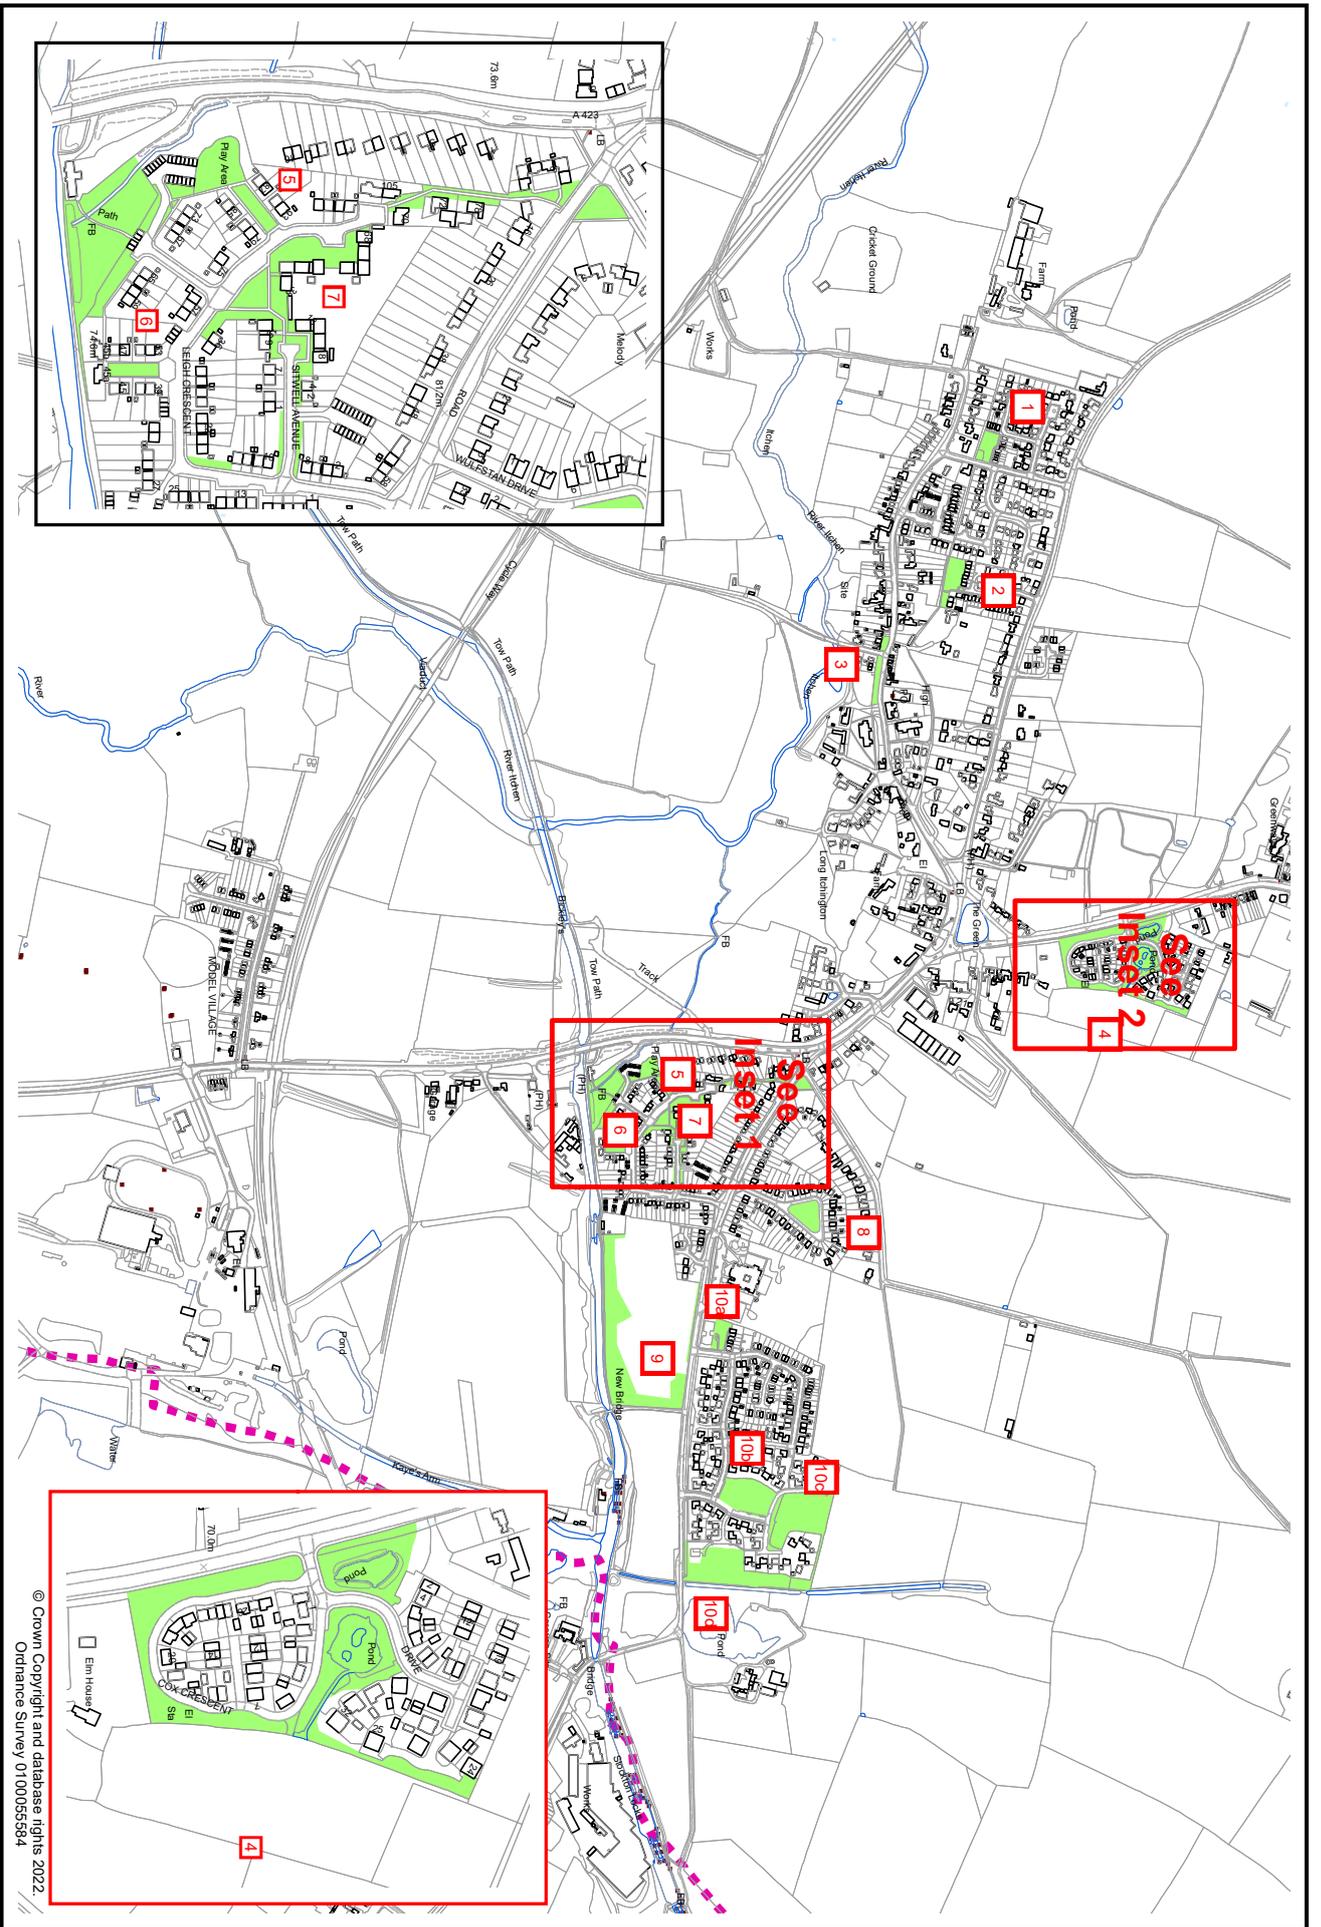

FIGURE 11: Incidental Green Space

 Ordnance Survey 010005584

Policy NE4 – Wildlife Habitats and Biodiversity

Development proposals should protect and, where possible, enhance the natural environment including valued landscapes, natural features, wildlife corridors and other biodiversity-rich areas. Inclusion of proposals to create, enhance and restore adjacent habitats for biodiversity is encouraged.

When constructing boundaries, hedges should be used in preference to walls and close-boarded fences; where used, the latter should incorporate suitable ground-level access to protect and enhance wildlife corridors.

Development proposals should ensure that the natural features and functions of watercourses and their wider corridors are retained and, where relevant, reinstated. Appropriate habitat buffers should also be assured.

All landscaping proposals should incorporate the planting of native tree and hedge species as well as nectar-rich plants

5.4.21 The character of the Neighbourhood Area is rural and it contains many areas of wildlife habitat and broad biodiversity. The evidence from consultation with local people is that this is of high value and importance.

5.4.22 Natural and commercial woodland (including Long Itchington Wood that has SSSI status), cultivated farmland and pasture, the River Itchen, Long Itchington Village Pond, the Grand Union Canal, active and disused quarries, industrial sites, the Dallas Burston Polo Ground, open spaces (including private gardens and allotments) all combine to form an ecological network and system. In addition, established nature reserves that are actively managed by the community at White's Spinney, Bascote Road and 'LILAC' (Long Itchington Leisure and Community) Field are further evidence of the local importance of the natural environment.

5.4.23 The relationship between any development site and adjoining land is important as they combine to form wildlife corridors that contribute to wildlife sustainability.

5.4.24 Retention and enhancement of the quality of these natural features underpins local people's enjoyment of the countryside and open spaces within the built environment and contributes to their wellbeing.

5.4.25 This policy seeks to protect and enhance the natural environment of the Neighbourhood Area.

Evidence:

5.4.26 Chart 38 of the QS results (page 55) shows that 80% of respondents consider wildlife habitats "Extremely" or "Very" important to their enjoyment of the Neighbourhood Area environment.

5.4.27 This policy is consistent with measures set out in Policy CS.7, Green Infrastructure, of the Core Strategy.

Policy NE5 - Flooding and Water Management

Development proposals should meet the requirements of Core Strategy Policy CS.4 and be sensitive to the impact on Climate Change. In particular, proposals should be designed to reduce the risk of flooding. A site-specific flood risk assessment may be required dependent on the scale, use and location of proposals, in line with the requirements of national policy and guidance, but may also be required based on locally available evidence.

Proposals that improve or enhance existing flood defence works benefitting land or properties in proximity to the River Itchen and its associated watercourses will be supported. No proposal should have an adverse impact on the effectiveness of existing flood defence works, including restriction of essential access to watercourses or flood defence structures for maintenance purposes. No development should be undertaken within a minimum of 8.0 metres of any point either along the banks of the River Itchen or the toe of any flood defence structure.

Information accompanying the proposals should demonstrate how any mitigation measures will be satisfactorily integrated into the design and layout of the development.

Dependent on the scale and nature of any development proposal, appropriate Sustainable Drainage Systems (SuDS) should be incorporated into new developments following the SuDS hierarchy. This should maximise any opportunities to enhance biodiversity, create amenity and contribute towards green infrastructure. Infiltration SuDS and above ground SuDS attenuation, such as swales, ponds and other water based ecological systems, should be used wherever feasible. Where it can be demonstrated that these are not practicable, development proposals are encouraged to maximise opportunities to use SuDS measures which require no additional land take, such as green roofs. Surface water drainage schemes should have regard to Warwickshire's Surface Water Management Plan (SWMP)

All development proposals are encouraged to control discharge runoff generated on site to the Greenfield runoff rate for all periods up to the 1 in 100 years plus climate change critical storm event using above ground sustainable drainage systems.

The reuse and recycling of water within development is encouraged including the use of water butts.

Explanation:

5.4.28 Flooding has occurred in the Neighbourhood Area, particularly in the centre of Long Itchington village, on numerous occasions over many years. Although works have been carried out in recent years to alleviate the risk it remains a significant issue of concern to local people most likely to be affected. In the light of historical issues, the Parish Council encourages positive discussions between all parties and, where appropriate, the undertaking of hydrology surveys at an early stage.

5.4.29 Warwickshire's Surface Water Management Plan can be viewed by visiting <https://www.warwickshire.gov.uk/swmp>. The plan outlines the methodology for prioritising action to protect flooding locations across Warwickshire and identifies locations at greatest risk.

5.4.30 Proposals that incorporate driveways and hard-standing areas constructed of permeable surface will help to minimise run-off.

5.4.31 The Environment Agency is opposed to the use of stilts or voids within the design of structures as mitigation for flood risk because of the potential for blockage during flood events leading to increased impact on neighbouring land and property.

5.4.32 All new dwellings are encouraged to install a minimum of 250 litre rainwater collection facility to help minimise discharge of water to the drainage system and help water conservation and management in order to help achieve the aims of this policy.

5.4.33 Flooding of homes or businesses has a major, adverse effect on the health and well being of

owners and occupiers. This policy therefore aims to prevent an increase in the risk of flooding and the distress and costs that it would cause to local people.

Evidence:

5.4.34 This policy is consistent with Policy CS.4 of the Core Strategy in its aim to ensure there is no adverse flooding impact from new development thus minimising the number of properties at risk of flooding.

5.4.35 Paragraph 159 of the National Planning Policy Framework published in 2021 states that “Inappropriate development in areas at risk of flooding should be avoided by directing development away from areas of highest risk (whether existing or future)” Paragraph 160 states that in determining the suitability of proposals, authorities should consider cumulative impacts in, or affecting, local areas susceptible to flooding, and take account of advice from the Environment Agency and other relevant flood risk management authorities”

5.4.36 This policy seeks to ensure that any proposal complies with and supports the objectives of the Water Environment (Water Framework Directive) (England and Wales) Regulations 2017 and the Severn River Basin Management Plan 2015.

Policy NE6 – Renewable Energy and Energy Efficiency

Dependent on their scale and nature, development proposals are encouraged to contribute to environmental sustainability through the inclusion of on-site renewable or low carbon producing technologies with the aim of maximizing as far as practicable their contribution to the development’s energy demands.

Proposals for renewable energy generation schemes will be supported providing that:

- a) they have no adverse impact on the Valued Landscapes and Views identified in Policy NE1;
- b) the design, scale and form of the proposal meets all other relevant policies set out in the Development Plan.

New dwellings must be constructed to a high standard of energy efficiency and thermal insulation in accordance with Building Regulations and have regard to Stratford on Avon’s Development Requirements SPD 2020, Part V Climate Change Adaptation and Mitigation.

Explanation:

5.4.37 This Plan seeks to encourage the use of renewable energy to minimise environmental pollution and maximise energy use efficiency in new buildings. The impact of this will deliver benefits locally and on a wider scale.

5.4.38 Proposals will only be supported where there is evidence that there is no unsustainable, adverse impact on the rural setting and character of the Neighbourhood Area and its settlements.

5.4.39 Only schemes that meet the relevant policies set out in the Plan intended to protect the Neighbourhood Area from inappropriate development will be supported.

Evidence:

5.4.40 Chart 54 of the QS results (page 54) shows that 58% of respondents consider that new development should incorporate renewable energy resources.

5.4.41 This policy is consistent with Policy CS.3, 'Sustainable Energy', of the Core Strategy. This contains measures to encourage energy efficiency of any new development and reasonable energy infrastructure balanced against the need for protection of the environment and the character and distinctiveness of the local area.

5.5 Community

Strategic Objectives:

- To preserve, protect and enhance the sense of pride and belonging that local people have in being a part of a rural community characterised by landscape and local countryside.
- To protect the sense of community from erosion by unsustainable growth in the scale of settlements in the Neighbourhood Area
- To encourage the integration of new residents as active members of the community.
- To preserve, protect and enhance an active, cohesive and inclusive community by ensuring that there are adequate resources and physical facilities necessary to support the activities of local voluntary groups and organisations throughout and beyond the life of this Plan.

Policy C1 – Protection of Existing Community Facilities

To be supported proposals that affect an existing community facility must:

- a) Evidence that the altered facility will better meet the needs of the community, or
- b) Provide a replacement in an equivalent location and form.

Development proposals should not result in the complete or partial loss of a community facility.

Explanation:

- 5.51** For the purpose of this policy: 'Community facilities' is defined as any land, building or structure that supports a non-commercial service or activity used, or capable of use by local people.
- 5.52** Community facilities provide the opportunity for local people to engage and socialise with one another and access services and activities to support them in their daily lives. They are crucial for development and maintenance of the cohesive, inclusive, active and vibrant community in the Vision Statement that is an integral part of this Plan and a product of local consultation.

5.53 A sense of community within an area is created by opportunities for local people to engage with one another in many different ways. These include, for example:

- Sharing experiences through attending or helping organise community events unique to the Neighbourhood Area;
- The ability to visit and use community facilities for example local pubs, the Community Centre, local places of worship, sports facilities, allotment gardens, public footpaths and bridleways giving access to the countryside etc.; and
- Sharing pride in the local environment and its unique qualities.

For these reasons it is essential to protect and expand this infrastructure that binds local people together as a recognisable community. This is particularly important in view of the substantial increase in local population resulting from the scale of recent housing building in the Neighbourhood Area.

5.54 There are 26 voluntary groups or organisations active in the Neighbourhood Area (September 2020). They are listed in the table in Figure 12. This policy seeks to ensure that they have the physical resources available to carry out their activities and contribute to creating a strong and healthy community.

Evidence:

- 5.55** Chart 31 of the QS results (page 55) shows that 85% of respondents consider the Neighbourhood Area to be friendly with good community spirit.
- 5.56** Chart 33 of the QS results (page 55) shows that 81% of respondents had attended a community event or meeting and the distribution of key places where this had taken place.
- 5.57** 'Planning for People' is a key strand in the approach to sustainable development identified in the explanation of Policy CS.1 of the Core Strategy. The stated objective is to "promote strong, vibrant and healthy communities". It is contended that as the population of the Neighbourhood Area increases as a result of new housing over the Plan period this can only be achieved by the protection and enhancement of community infrastructure and facilities.

Community Aspiration:

Community Engagement.

- a) The Neighbourhood Area is proud of its active community but recognises that even more could be done to engage all groups of residents, particularly teenagers, young adults and older people.
- b) A project to build on the results of the Questionnaire Survey that provides the evidence for this Plan is, therefore

proposed to identify community needs, gaps in provision and proposals to enhance community engagement amongst all groups in the Neighbourhood Area.

- c) The project will seek to produce a 'Community Strategy' that will match needs to existing resources or make proposals about how new facilities could be developed. This could also include how to ensure that existing facilities are used to their maximum capacity.

Policy C2 – Support for New Community Facilities

In principle, development proposals that support the retention of community hubs and community assets or facilitate the expansion of their use are supported.

Comments from local people during consultation about this Plan showed that whilst the existing accommodation meets general needs it is inflexible and not well suited to meet growing and different demand from a larger local population.

This policy, linked to other policies in this Plan relating to the use and development of land within the Neighbourhood Area reserves the opportunity to identify a site for replacement or additional community centre facilities if the community consider this appropriate during the life of this Plan.

The precise location, form, scale and design of any such development would be determined by a separate study to be carried out governed by all relevant policies in this Plan.

The Neighbourhood Area Parish Council intends to sponsor a community led project during the life of this Plan to produce a 'Community Strategy'.

This will help to identify, amongst other outputs, the need for replacement or additional community centre facilities in the Neighbourhood Area. The project is described more fully in the 'Community Aspirations' section of this Plan

Explanation:

5.5.8 'Community Facilities' for the purpose of this policy has the same definition as set out in paragraph 1 of the explanation supporting Policy C1.

5.5.9 Development of new or improved community facilities to meet identified needs or aspirations of local people will help to achieve the strategic objectives identified in this section of the Plan.

5.5.10 The existing community centre was opened in 1979 and designed to cater for the needs and aspirations of a significantly different community in terms of its scale and demographic profile.

Community Aspiration:

Community Centre Options

This Policy confirms that whilst the existing accommodation meets the general needs of local people, a wider range of activities could be accommodated in larger and more flexible premises.

Ideas put forward through consultation include:

- A community café to encourage more community interaction;
- A wider range of spaces to hire for different activities supporting voluntary groups and organisations;
- The opportunity for more than one activity to take place at the same time if more flexible spaces are available;

- Meeting rooms available to hire to support local home-based businesses together with access to electronic communications and media services;
- Accommodation for community services, for example periodic health or social, financial and family advice clinics.

Any proposal would need to be fully examined and supported by a detailed and robust business case to demonstrate its practical and financial viability.

The existing accommodation is considered to be at or close to full capacity and not capable of adapting to increased demand from a growing local population.

Proposals will be supported for the provision of a replacement community centre or alternative facilities to serve the Neighbourhood Area in a format that meets the needs of the local community if it either becomes necessary or desirable during the life of this Plan.

It is positively noted that Cemex has offered to engage in discussions about provision of community centre facilities at the master planning stage of any proposal to redevelop the brownfield elements of its site in accordance with Core Strategy Policy AS.11.

FIGURE 12: Active Voluntary Groups Table (September 2020)

5.6 Sport, Leisure and Recreation

Policy SLR1 – Sports Grounds and Children’s Play Areas

In principle, proposals for development of new sports grounds and children’s play areas or improvements to existing facilities will be supported.

To be supported, proposals that affect an existing facility must:

- a) Establish that the proposed development meets an identified need of local people for instance for housing, social or community facilities; and

- b) Include for the replacement of the existing facility in an equivalent location and to a standard at least equivalent to the one affected.

Development proposals should not result in the complete or partial loss of a sports ground or children’s play area.

Explanation:

- 5.6.1** Access to quality sports and play facilities are essential for the health and wellbeing of local people of all ages. Evidence from the questionnaire survey and other consultation gathered in the development of this Plan supports the protection of existing facilities.
- 5.6.2** Sports and play facilities provide an important opportunity for local people of all ages to interact and build community cohesion.
- 5.6.3** The Neighbourhood Area benefits from a significant number of voluntary groups that depend on access to sports facilities for organised or informal activity. It is, therefore, essential that existing facilities are protected and new facilities are encouraged, particularly in view of the current and projected growth in local population.

Evidence:

- 5.6.4** Policy CS.25 of the Core Strategy states that: “The provision of new and enhanced community, cultural, sport and leisure facilities will be encouraged as a way of promoting healthy, inclusive communities.
- 5.6.5** Chart 39 of the QS results (page 56) shows that 57% of respondents consider that sports facilities are “Extremely” or “Very” important to their enjoyment of the Neighbourhood Area environment.

- 5.6.6** Chart 28 of the QS results (page 54) shows that 52% of respondents between the ages of 16 and 26 feel that they are “Not at all well” or only “Fairly well” provided for in the Neighbourhood Area. It is contended that it is this age range most likely to benefit from the retention or enhancement of sports facilities.

- 5.6.7** Chart 42 of the QS results (page 56) shows that 35% of respondents consider that there should be more sports facilities and existing ones should be improved.

- 5.6.8** The Houses of Parliament POSTnote 538 entitled ‘Green Space and Health’ published in October 2016 concludes in its Overview that areas with more accessible green spaces for leisure and recreation are associated with better mental and physical health. It is contended that this applies for all age groups including children for whom there is growing national concern about the impact of obesity.

Policy SLR2 – Access to the Countryside

In principle, development proposals that create new public rights of way, provide a link between existing ones or improve access to the network for people with special needs will be supported

To be supported, development proposals should assess and address, with mitigation where appropriate, their potential to impact on access to, or enjoyment of the network of public footpaths, bridleways, the 'Sustrans' disused railway route and canal towpath.

Explanation:

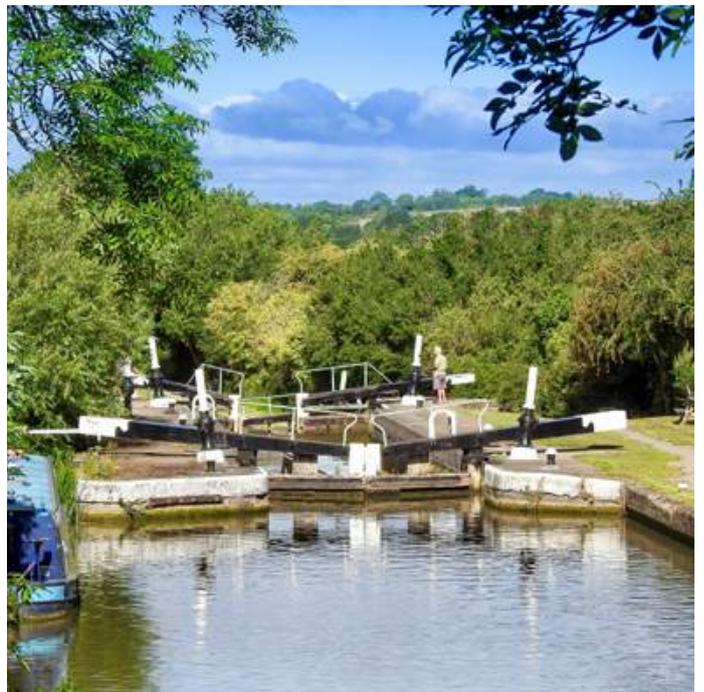

- 5.6.9** The countryside surrounding the Neighbourhood Area settlements is a key local asset. Access to the countryside for local people and visitors is vitally important for the health and wellbeing of everyone.
- 5.6.10** A pictorial map showing the public footpath network within the Neighbourhood Area is shown in Figure 13. Warwickshire County Council maintains the 'Definitive' public footpath map. This can be viewed by visiting Warwickshire County Council's website and searching for 'Definitive Map'.
- 5.6.11** The policy seeks to encourage and support improvements to the network to enhance the experience and health benefits for local people and visitors from countryside views and close proximity of the natural environment. It also seeks to protect these benefits from erosion by inappropriate development in open countryside that result in public accessways passing through or adjacent to it.
- 5.6.12** Horse riding and recreational walking are popular activities in the parish and this is demonstrated by the results of the questionnaire survey. It is, therefore, essential to protect the existing network that allows access into the heart of the countryside and desirable to encourage its expansion.
- 5.6.13** It is recognised that the whole length of a public right of way is unlikely to be within one application site. However, it is possible that a section may pass through the site, it may have a boundary with part of the length or it could provide a link between two existing public rights of way. It is also recognised that Warwickshire County Council would also need to support any proposals as the authority responsible for public rights of way.

- 5.6.14** The major work to sections of the Sustrans route, known as the Lias Line project, announced in August 2020 is an example of significant improvement to sustainable movement through the Neighbourhood Area for pedestrians, cyclists and horse riders that this policy seeks to promote.

Evidence:

- 5.6.15** Chart 38 of the QS results (page 55) shows that 80% of respondents consider that Neighbourhood Area public footpaths and bridleways are "Extremely" or "Very" important to their enjoyment of the Neighbourhood Area environment.
- 5.6.16** Chart 38 of the QS results (page 55) also shows that 81% of respondents consider the rural setting of the Neighbourhood Area to be "Extremely" or "Very" important to their enjoyment of the Neighbourhood Area environment. A well-developed and maintained network of footpaths and bridleways the public are permitted to use allows access to the heart of the countryside that provides this rural setting valued by the majority of local people.

ARISH FOOTPATHS

FIGURE 13: Pictorial Footpath Map

APPENDIX A

Questionnaire Survey Result Charts Specifically Referenced in this Document as Evidence

The policies set out in this Neighbourhood Plan are significantly informed by the results of the Questionnaire Survey of all residents of 16 years old and over, local businesses and voluntary interest groups undertaken in late 2016. The survey achieved an outstanding response rate from residents of 74%.

Results from the Questionnaire Survey are cited as evidence to support and explain the reasons why the policies have been developed reflecting the views of local people. The result charts referred to throughout the Neighbourhood Plan that contain this specific evidence are set out in this Appendix in sequential order for ease of reference.

LONG ITCHINGTON NEIGHBOURHOOD DEVELOPMENT PLAN

Local Green Space Site Assessment: March 2019

Site Address	Site Area	Site Ref
Allotment Gardens, north of Church Rd / at the junction of Bascote Rd and Cemetery Land to the east, Long Itchington (NOTE: Cemetery was not included in the independent assessments)	Approx. 0.62 ha	Pre-Examination: LGS 3 Post Examination: LGS 1
Plan		
<p>NOTE: Cemetery Land in green was not part of this pre-examination independent assessment</p> <p>Re-numbered post-examination as LGS 1</p>		
Site Description and Current Land Use		
<p>The rectangular shaped allotment garden is well-maintained, and actively. It is located in the heart of the village, north of Church Road. It is intersected from southwest to northeast by a tarmac footpath at the southern end of the site and an informal grass path through the centre of the site from north to south.</p> <p>Within the site are numerous well-tended horticultural beds, water butts, outside tap, sheds, compost bins and poly tunnels. The Grade II* listed, Church of the Holy Trinity is a prominent feature in skyline looking southeast from the site. The grounds of residential dwellings border the site on all but the northeastern boundary where there is a cemetery.</p> <p>A combination of featherboard and wrought iron fencing line the site to the north, east and west. A brick wall lines the southwest corner and the back of residential dwellings line the southern boundary.</p>		
Relevant Planning History		

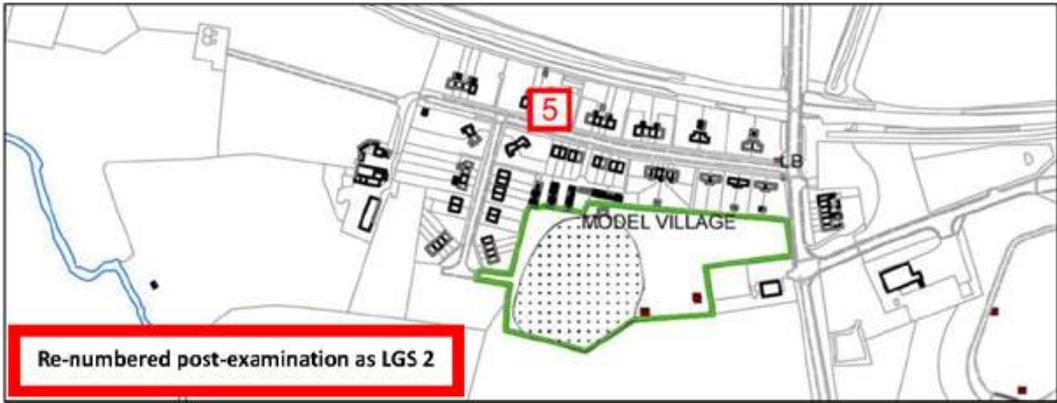

Site Ownership
A Land Registry Search has revealed the site is unregistered.
Site Constraints
<p>The southern part of the site below the footpath sits within the conservation area.</p> <p>It sits within an area of medium archaeology sensitivity and borders an area of high sensitivity to the south according to the Historic Environment Assessment (Ed. 4.9.1), Stratford-on-Avon District, July 2012 conducted by AOC Archaeology Group.</p>
Public Access
The public do not have access to the gardens. There is, however, a public right of way (Footpath SM2 – Jubilee Way) through the site.
Site Photo

Ecological Significance
<p>The allotment gardens contain a variety of food and ornamental planting. All of which are important for a number of birds and mammals as they provide food, shelter and nesting sites. They increase the diversity of insect species (including butterflies and bees which are currently in decline), which are a food source for bird and mammal species and can also play an important role in the pollination of plants and crops in the surrounding area. The diversity and population numbers of insects directly impacts the food chain for other fauna in the area and has a wider impact on the cultivation of crops.</p> <p>These are all vital for the wider food web and species diversity within the village’s ecosystem. In the village, there have been sightings of larger fauna species such as bats, birds of prey (e.g. buzzards and owls), rabbits and hedgehogs. The site plays an important contributory role in the wider ecological significance of the village.</p>

Special Qualities and Local Significance
<p>The site is an important natural habitat that encourages wildlife.</p> <p>The site is locally significant because it is well-used and valued by the local community as an allotment garden. This well-tended allotment garden provides recreational value for residents with the opportunity to exercise and socialise while gardening for a cross-section of the community. The produce grown also contributes to sustainability and encourages sustainable living.</p> <p>The site represents a 'green lung' at the heart of Long Itchington village. The special qualities of the site include its strong contribution to local character and distinctiveness due to its natural beauty. It is also highly appreciated and prized by the local community as an undeveloped area of open land which contributes to its green setting and infrastructure.</p>
Summary and Suitability for Designation as Local Green Space
<p>This site is well related to and appreciated and valued by the local community and makes a positive contribution to the local distinctiveness of the village.</p> <p>The LGS as outlined on the above plan is considered to be suitable for Local Green Space designation in accordance with paragraphs 99-101 of the National Planning Policy Framework in that it is:</p> <ul style="list-style-type: none"> • in reasonably close proximity to the community it serves; • demonstrably special to a local community and holds a particular local significance because of its recreational value (including as a playing field), tranquillity and richness of its habitats and wildlife potential; and • local in character and is not an extensive tract of land.

<p>Public Access</p> <p>The site is open and accessible to the public.</p>
<p>Site Photos</p> 

Ecological Significance

With the exception of the trees and shrubs that frame and sporadically populate the site, the majority of the site has low ecological value.

The mixed species trees and shrubs that are there are important for a number of birds and mammals as they provide food, shelter and nesting sites. They increase the diversity of insect species (including butterflies and bees which are currently in decline), which are a food source for bird and mammal species and can also play an important role in the pollination of plants and crops in the surrounding area. The diversity and population numbers of insects directly impacts the food chain for other fauna in the area and has a wider impact on the cultivation of crops.

Trees provide nesting sites for birds as well as habitats for small mammal species e.g. squirrels. These are all vital for the wider food web and species diversity within the village's ecosystem and wildlife corridors. In the village, there have been sightings of larger fauna species such as bats, birds of prey (e.g. buzzards and owls), rabbits and hedgehogs. The site plays an important contributory role in the wider ecological significance of the village.

Special Qualities and Local Significance

The well-used site is adjacent to the Model Village built-up area and south of the main settlement. It is the only recreational facility serving this area of Long Itchington.

The special qualities of the site include its recreational and social value for children and adults and as an amenity space for walkers and dog walkers.

The site is demonstrably special and locally significant as it is actively used and valued by the community and visitors as a formal area of open space, providing highly valued social, recreation and sports opportunities for local people of all ages.

Summary and Suitability for Designation as Local Green Space

This site is well related to and appreciated and valued by the local community and makes a positive contribution to the local distinctiveness of the village.

The LGS as outlined on the above plan is considered to be suitable for Local Green Space designation in accordance with paragraphs 99-101 of the National Planning Policy Framework in that it is:

- within the community it serves;
- demonstrably special to a local community and holds a particular local significance because of its recreational value (including as a playing field), tranquillity and richness of its habitats and wildlife potential; and
- local in character and is not an extensive tract of land.

LONG ITCHINGTON NEIGHBOURHOOD DEVELOPMENT PLAN

Local Green Space Site Assessment: March 2019

Site Address	Site Area	Site Ref
The Green and Village Pond at the junction of / on Leamington, Church and Stockton Roads, Long Itchington	Approx. 0.93 ha	Pre-Examination: LGS 7 Post-Examination: LGS 4

Plan

Site Description and Current Land Use

The site is a registered Village Green at the heart of Long Itchington. At the centre of the site is The Green, which is a triangular open green space with large pond. It is located at the junction of Leamington, Church and Stockton Roads. Surrounding The Green along the aforementioned roads are six smaller open green spaces. They are surrounded by residential dwellings on all sides apart from the southeastern most space where a small industrial estate lies to the northeast of it.

With the exception of the Village Pond, all the spaces within the The Green are well-maintained grass areas populated with an assortment of mature trees and occasional benches. At the time of inspection, spring bulbs such as daffodils, crocuses and snowdrops were in flower. The central green is separated from the Village Pond by a low galvanised steel fence. Within this part of the site there is a noticeboard explaining the history of the century old pond and another identifying the fish within it. Around the pond itself are a number of wetland plants and water fowl, including ducks, geese and sea gulls.

The area directly south of the main part of The Green has an electricity sub-station, a brick-built bus shelter and a footpath across it and along its southern boundary. Public footpaths, Millennium Way and Centenary Way, pass near the site from the west and southwest. There are numerous listed buildings surrounding the site to the southwest, northeast and southeast; including the Grade II* listed, Tudor House.

Relevant Planning History

- Application Reference: 17/03317/FUL
- Address: Land at The Green Long Itchington
 - Proposal: The construction of a permanent external memorial, comprising of a stone paved circle, with three stone inscribed columns on a granite supporting plinth and adjacent seating.
 - Decision: Permission with conditions
 - Date Decision Issued: 28/03/2018

Site Ownership

A Land Registry Search revealed that the land is unregistered.

Site Constraints

The site sits within the conservation area and is a registered Village Green.

It also sits within the historic core of Long Itchington and an area of high archaeology sensitivity according to the Historic Environment Assessment (Ed. 4.9.1), Stratford-on-Avon District, July 2012 conducted by AOC Archaeology Group.

There are numerous listed buildings surrounding or in close proximity to the site. To the southwest are Yew Tree Farmhouse and Yew Tree Cottage. To the northeast is the Red House and to the southeast is the Grade II* listed, Tudor House.

Public Access

The site is open and accessible to the public.

Site Photos

Ecological Significance

Due to the nature of its use, the site has high ecological value. The site contains a mix of mature, semi-mature trees, wetland plants and spring bulbs.

The Village Pond provides a haven for amphibians, invertebrates, small mammals, insects and birds and their associated nesting sites. Various species of water fowl including ducks, sea gulls and geese were seen within the site at the time of inspections.

The pond together with the trees create a wildlife corridor and provides food and shelter for numerous species. These are all vital for the wider food web and species diversity within the village ecosystem. And as such, the site plays a contributory role in the wider ecological significance of the village.

Special Qualities and Local Significance

The Green and Village Pond significantly contribute to the unique character and distinctiveness of the village, particularly the conservation area at the heart of Long Itchington village.

It sits at the historic core of Long Itchington and strongly links to the historic origins and development of the settlement. The site forms the setting of a number of listed buildings. The Village Pond has been on the site for a century and archaeology evidence suggests that there may have been a medieval market there at one time.

The special qualities of the site include its contribution to the village's historic and social past as a place of public gathering and remembrance at the war memorial which is inscribed with a poem by the renowned reformer, writer and poet, Dame Margaret Postgate Cole, DBE.

The site maintains the sense of the openness within the built-up area particularly around the main pedestrian and road routes through the settlement. Due to its natural beauty and open aspect, the site makes a strong contribution to the village's local character, distinctiveness and green setting and infrastructure.

Summary and Suitability for Designation as Local Green Space

This site is well related to and appreciated and valued by the local community and makes a positive contribution to the local distinctiveness of the village.

The LGS as outlined on the above plan is considered to be suitable for Local Green Space designation in accordance with paragraphs 99-101 of the National Planning Policy Framework in that it is:

- within the community it serves;
- demonstrably special to a local community and holds a particular local significance because of its important historical significance, the contribution it makes to the open character of the village, the contribution it makes to the setting of heritage assets and accessibility to the community; and
- local in character and is not an extensive tract of land.

LONG ITCHINGTON NEIGHBOURHOOD DEVELOPMENT PLAN

Local Green Space Site Assessment: March 2019 (Revised 2 September 2020)

Site Address	Site Area	Site Ref
Green End recreation ground and playground, north of Green End, Long Itchington	Approx. 4.24ha	Pre-Examination: LGS 8 Post-Examination: LGS 5
Plan		
Site Description and Current Land Use		
<p>The site is a well-maintained, formal recreation ground and enclosed playground located north of Green End. It is the main recreation ground for the village. At the time of inspection, the playground was in the process of being refurbished.</p> <p>All-weather footpaths traverse the site as well as along the site’s boundaries apart from the southeastern border. Within the site there is a football pitch and posts, floodlights, outdoor gym equipment, four oversized tyres, a skateboard park and multi-use games area and play equipment for young children. A pavilion and public toilets are situated along the middle of the site’s southern boundary.</p> <p>Residential dwellings can be found to the east, southwest and southeast of the site. The informal ecological and recreation area, Lilac Fields, borders the site to the north and open countryside to the west. It is surrounded by an assortment of trim hedges, shrubs and mature trees with some new tree planting evident.</p>

Public Access
<p>The site is open and accessible to the public.</p>

Site Photos

Ecological Significance

Due to the nature of its use, the site has limited ecological value. However, there is some ecological value within the site with the presence of a number of trees. These can help create a wildlife corridor and provide food and shelter for numerous species, such as insects, small mammals and birds and their associated nesting sites. All of which are vital for the wider food web and species diversity within the village ecosystem. And as such, the site plays a minor contributory role in the wider ecological significance of the village.

Special Qualities and Local Significance

There are a number of open green spaces that together make up the village green within Long Itchington. They significantly contribute to the unique character and distinctiveness of the local area, particularly the conservation area at the heart of Long Itchington village. They maintain the sense of the open, low density form of development within the built-up area particularly around the main pedestrian and road routes through the settlement.

The distribution of the open green spaces comprising the village green also strongly links to the historic origins and development of the settlement. This particular site forms the setting of a number of listed buildings; most notably the Grade II* listed, Church of the Holy Trinity, and its associated Grade II listed tombs are situated to the east of the site.

Due to its natural beauty and open aspect, the site makes a strong contribution to the village's green setting and infrastructure.

Summary and Suitability for Designation as Local Green Space

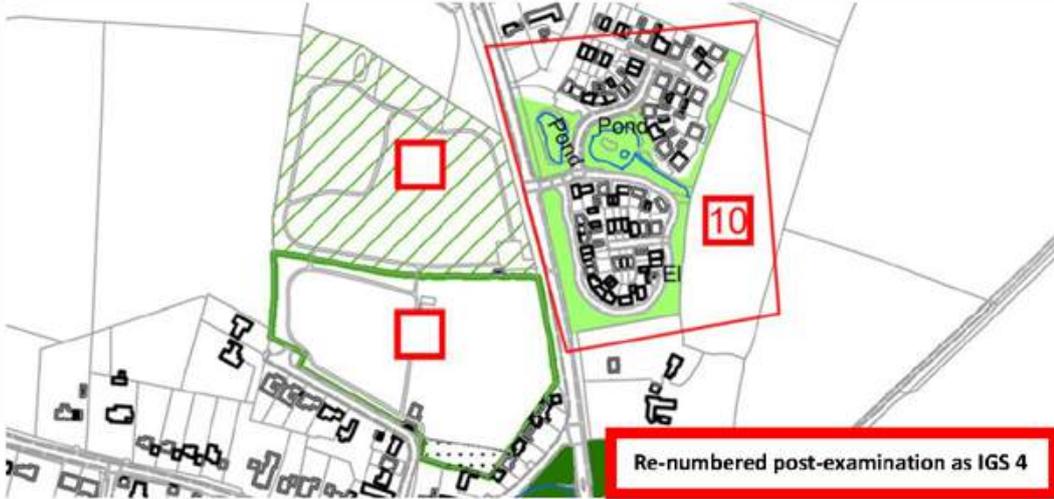

This site is well related to and appreciated and valued by the local community and makes a positive contribution to the local distinctiveness of the village.

The LGS as outlined on the above plan is considered to be suitable for Local Green Space designation in accordance with paragraphs 99-101 of the National Planning Policy Framework in that it is:

- within the community it serves;
- demonstrably special to a local community and holds a particular local significance because of its important historical significance, the contribution it makes to the open character of the village, the contribution it makes to the setting of heritage assets and accessibility to the community; and
- local in character and is not an extensive tract of land.

LONG ITCHINGTON NEIGHBOURHOOD DEVELOPMENT PLAN

Local Green Space Site Assessment: March 2019

Site Address	Site Area	Site Ref
Bishops Drive and Cox Crescent, Green and Ponds, east of Marton Road, Long Itchington	Approx. 0.68 ha	Pre-Examination: LGS 10 Post-Examination: IGS 4
Plan		
		
Site Description and Current Land Use		
<p>The site is part of the green infrastructure within a new housing estate. It consists of a network of well-maintained open green spaces, two large ponds and channel located around and intersected by Cox Crescent and Bishops Drive.</p> <p>Residential dwellings are situated to the north and south of the site. To the southwest of the site is the Recreation Ground. To the west is Lilac Field. Beyond the site's boundaries to the east are open fields. An electricity substation is located in the southeastern corner of the site. There is a PRoW meeting the site's northern boundary and another running along the site's southern boundary.</p> <p>A mature hedge and trees border the site's boundaries to the south, east and west. Low square wooden bollards line the road frontages around the pond and low post and rail fencing line the road frontages of many of the green spaces. There is evidence of new hedge, tree, and wetland and shrub planting. Numerous bird nesting boxes were observed in the trees.</p>		

Relevant Planning History

Site Ownership

BLOOR HOMES LIMITED (Co. Regn. No. 02162561) of Ashby Road, Measham, Swadlincote DE12 7JP

Site Constraints

The norther half of the site sits within an area of Low archaeology sensitivity and an area of Medium sensitivity within the southern half according to the Historic Environment Assessment (Ed. 4.9.1), Stratford-on-Avon District, July 2012 conducted by AOC Archaeology Group.

The site lies within zone LI03, an area of Medium Sensitivity to housing and High to commercial development according the Stratford-on-Avon District Landscape Sensitivity Assessments for Villages, Volume 1 (2012) by White Consultants.

Public Access

The site is open and accessible to the public.

Site Photos

Ecological Significance

Due to the nature of its use, the site has high ecological value. The site contains a mix of mature, semi-mature and newly planted trees and shrubs, wetland plants and spring bulbs.

The ponds with their small islands with wetland planting provide a haven for amphibians, invertebrates, small mammals, insects, water fowl and other birds and their associated nesting sites. Ducks were seen within the site at the time of inspections.

The pond together with the trees and shrubs create a wildlife corridor and provides food and shelter for numerous species. These are all vital for the wider food web and species diversity within the village ecosystem. And as such, the site plays a contributory role in the wider ecological significance of the village.

Special Qualities and Local Significance
<p>The special qualities of the site include its recreational value for residents and the sense of openness and well-being that its natural environment offers in this new development.</p> <p>It is also highly appreciated and valued by the local community for its benefits to local wildlife as well as its contribution to biodiversity and green infrastructure.</p> <p>Due to its natural beauty and open aspect, the site makes a strong contribution to the village's local character, distinctiveness and green setting.</p>
Summary and Suitability for Designation as Local Green Space
<p>This site is well related to and appreciated and valued by the local community and makes a positive contribution to the local distinctiveness of the village.</p> <p>The LGS as outlined on the above plan is considered to be suitable for Local Green Space designation in accordance with paragraphs 99-101 of the National Planning Policy Framework in that it is:</p> <ul style="list-style-type: none"> • within the community it serves; • demonstrably special to a local community and holds a particular local significance because of its informal recreational value, tranquillity and richness of its habitats and wildlife potential; and • local in character and is not an extensive tract of land.

<p>Public Access</p>
<p>The site is open and accessible to the public.</p>
<p>Site Photos</p>

Ecological Significance

The ecological value of the site lies predominantly in the brook that runs through the site and in the mix trees in and around it. These natural features provide the perfect habitat for shelter, nesting sites and food for many birds, amphibians, invertebrates and insects. They increase the diversity of insect species (including butterflies and bees which are currently in decline), which are a food source for bird and mammal species and can also play an important role in the pollination of plants and crops in the surrounding area. The diversity and population numbers of insects directly impacts the food chain for other fauna in the area and has a wider impact on the cultivation of crops.

Within the village, there have been sightings of larger fauna species such as bats, birds of prey (e.g. buzzards and owls), rabbits and hedgehogs. These are all vital for the wider food web and species diversity within the village's ecosystem. As such, they play an important contributory role in the wider ecological significance of the village as part of its green infrastructure and wildlife corridor.

Special Qualities and Local Significance

The special qualities of the site include its recreational and social value for children and adults as an open green space on the southeastern side of the village. This open green space serves the local residents, walkers and dog walkers of the immediate area and provides a sense of openness in this natural environment. The site also provides part of the setting for the Grand Union Canal and Grand Union Canal Walk which border the site to the south.

Due to its natural beauty and open aspect, it strongly contributes to the village's local character and green setting and infrastructure. The site is demonstrably special and locally significant as it is actively used and valued by the local community as an informal area of open space.

Summary and Suitability for Designation as Local Green Space

This site is well related to and appreciated and valued by the local community and makes a positive contribution to the local distinctiveness of the village.

The LGS as outlined on the above plan is considered to be suitable for Local Green Space designation in accordance with paragraphs 99-101 of the National Planning Policy Framework in that it is:

- in reasonably close proximity to the community it serves;
- demonstrably special to a local community and holds a particular local significance because of its recreational value, tranquillity and richness of its habitats and wildlife potential; and
- local in character and is not an extensive tract of land.

Site Address	Site Area	Site Ref
Cluster of incidental green communal spaces and verges, from the junction of Collingham Lane and Stockton Rd to Leigh Crescent, Long Itchington	Approx. 0.42 ha	Pre-Examination: LGS 13 Post-Examination: IGS 7
Plan		
Site Description and Current Land Use		
<p>The site consists of a mosaic of incidental green spaces that weave through a built up residential area spanning the junction of Collingham Lane and Stockton Road to Leigh Crescent. The pattern of development was designed with linked incidental green spaces that together have collective value.</p>		

Numerous mature, semi-mature and newly planted trees, trim hedges, shrubs and daffodils populate the majority of the spaces with some spaces being formally landscaped. Within the site are two notice boards and a bench. They are all accessible through public footpaths that traverse the site. Low post and rail fencing borders the road frontages of the larger communal grass areas.

Residential dwellings surround the site on all sides. The Grand Union Canal and Grand Union Canal Walk are in close proximity to the site to the south.

HEART OF ENGLAND HOUSING ASSOCIATION LIMITED (Industrial and Provident Society No. IP30446R) of 10 Greenhill Street, Stratford-Upon-Avon, Warwickshire CV37 6LG

The area on the northeast corner of Collingham Lane and Stockton Road:

A Land Registry search revealed this part of the site is unregistered

Site Constraints

It sits within an area of Low archaeology sensitivity according to the Historic Environment Assessment (Ed. 4.9.1), Stratford-on-Avon District, July 2012 conducted by AOC Archaeology Group.

Public Access

The site is open and accessible to the public.

Site Photos

Ecological Significance

Due to the nature of its use, the site has limited ecological value. However, there is some ecological value with the presence of the number of trees, shrubs and hedges that inhabit the site.

These contribute to the village's wildlife corridor and green infrastructure. Additionally they provide food and shelter for numerous species, such as insects, small mammals and birds and their associated nesting sites. All of which are vital for the wider food web and species diversity within the village ecosystem. And as such, the site plays a contributory role in the wider ecological significance of the village.

Special Qualities and Local Significance

These incidental green spaces significantly contribute to the unique character and distinctiveness of the local area. It maintains the sense of openness and low density within this built-up area.

Due to its natural beauty and open aspect, the site makes a strong contribution to the village's green setting and infrastructure. The site is demonstrably special and locally significant as it is actively used and valued by the local community, walkers and dog walkers as both formal and informal areas of open space.

Summary and Suitability for Designation as Local Green Space

A Land Registry search has revealed that the drives in front of numbers 2 and 4 Sitwell Avenue are privately owned and are of hard standing. It is recommended that the drives in front of these properties are removed from the proposed LGS designation and associated LGS map.

However, the rest of the site is well related to and appreciated and valued by the local community and makes a positive contribution to the local distinctiveness of the village.

With the exception of the drives in front of numbers 2 and 4 Sitwell Avenue, the LGS as outlined on the above plan is considered to be suitable for Local Green Space designation in accordance with paragraphs 99-101 of the National Planning Policy Framework in that it is:

- within the community it serves;

- demonstrably special to a local community and holds a particular local significance because of its informal recreational value, accessibility to the public, tranquillity and wildlife potential; and
- local in character and is not an extensive tract of land.

LGS 16d

Ecological Significance

Due to the nature of its use, the site has high ecological value. The site contains a mix of mature, semi-mature and newly planted trees and shrubs.

The pond and stream will provide a haven for amphibians, invertebrates, small mammals, insects, water fowl and other birds. Together with the trees and shrubs, these create a wildlife corridor and provides food and shelter for numerous species. These are all vital for the wider food web and species diversity within the village ecosystem. And as such, the site plays a contributory role in the wider ecological significance of the village.

As noted in the description, part of the site consists of a density area of trees and is being left to grow naturally in partnership with the RSPB. The sign adjacent to that space notes:

“As piles of wood rot and lichen and fungi start to grow on them providing food and places to live for lots of different types of bugs. Bugs are at the bottom of the food chain, so the more bugs there are, the more other bigger badgers, hedgehogs and birds have to eat. They are also very good for providing shelter for animals like hedgehogs over wintertime when they hibernate.”

Special Qualities and Local Significance

The distribution of these parcels of green spaces also strongly links to the historic origins and development of the settlement.

The special qualities of the site include its recreational and amenity value for residents (such as the play area found in LGS 16a) as well as the sense of openness and well-being that its natural environment offers in this new development.

It is also highly appreciated and valued by the local community for its benefits to local wildlife as well as its contribution to biodiversity and green infrastructure.

Due to its natural beauty and open aspect, the site makes a strong contribution to the village’s local character, distinctiveness and green setting.

Summary and Suitability for Designation as Local Green Space

This site is well related to and appreciated and valued by the local community and makes a positive contribution to the local distinctiveness of the village.

The LGS as outlined on the above plan is considered to be suitable for Local Green Space designation in accordance with paragraphs 99-101 of the National Planning Policy Framework in that it is:

- within the community it serves;
- demonstrably special to a local community and holds a particular local significance because of its informal recreational value, tranquillity and richness of its habitats and wildlife potential; and
- local in character and is not an extensive tract of land.

GLOSSARY:

Brownfield	Land which is or was occupied by a permanent structure, including the curtilage of the developed land (although it should not be assumed that the whole of the curtilage should be developed) and any associated fixed surface infrastructure. This excludes: land that is or was last occupied by agricultural or forestry buildings; land that has been developed for minerals extraction or waste disposal by landfill, where provision for restoration has been made through development management procedures; land in built-up areas such as residential gardens, parks, recreation grounds and allotments; and land that was previously developed but where the remains of the permanent structure or fixed surface structure have blended into the landscape. ACKNOWLEDGEMENTS:

Producing this document has been a long and involved process and the Long Itchington Neighbourhood Plan Steering Group has felt the weight of responsibility of ensuring residents' views and wishes were clearly represented, while at the same time adhering to the limitations of what Neighbourhood Plans can do. Particular thanks must go to:

- All the residents of Long Itchington, Bascote and Bascote Heath who helped shape the vision of this Plan, gave feedback through meetings and formal consultations, distributed and collected questionnaires, responded to the questionnaire in such numbers (74% of residents), provided photographs and who voted in the referendum.
- All businesses and landowners who responded to consultations.
- Community Rights Programme, the Department for Communities and Local Government and National Lottery for their grants.
- Andrew Jack (the only member of the 5 strong Steering Group who is not a Long Itchington Parish Councillor) who, virtually single-handedly, drafted the text of the first two versions of our NP, translating the vision into "policy speak" and devoted a huge amount of time and effort to this task.
- Jeremy Atkins of Researchcraft Ltd who produced and analysed our Questionnaire Survey and presented those results to the Steering Group
- WRCC for the two Housing Needs Surveys, 2016 & 2022
- Paul Telfer at "paul telfer graphic design" for translating numerous Word documents and pictures into a cohesive and attractive document.
- Rachel Atkins at Lemon Quartz Publishing, for the logo design, vision statement publication and assorted technical support
- Liz and John Bonney for practical assistance in numerous ways.
- Steve Crosthwaite for extensive analysis of tourism assets
- Andrew Mathieson for his patience and invaluable advice on making our Plan more concise and effective and ready for referendum.
- Stratford upon Avon District Council, particularly Matthew Neal, Louisa Slator and Elizabeth Taylor.
- Avon Planning Services – Neil Pearce and Jan Sherwood for advice, assessment and reviews of Local Green Spaces mapping
- Mark and Sharon Carver-Smith for the use of the function room at the Green Man public house.
- Holy Trinity Church for allowing us to use Thursday Teas as an additional consultation venue.
- Kieran Fleming for Front Page image
- Malcolm Hepple for Landscapes and Views images.
- Long Itchington Parish Council for support and advice
