TALENT & INNOVATION

A highly skilled & experienced workforce supported by easy access to major regional talent pools across the Midlands & South-East.

A thriving education ecosystem underpins the area, with strong, established partnerships with the universities of Warwick, Coventry & Birmingham. These places of learning provide direct access to cutting-edge research, innovation expertise & a diverse pipeline of graduate talent, with the University of Warwick Innovation Campus at Wellesbourne being at the heart of this.

The Warwickshire Skills Hub is available to assist businesses in sourcing new talent, promoting their business to those seeking employment & career opportunities, & in developing effective skills plans. Our businesses, educational establishments & communities are all supported to create a well skilled population that meets the needs of the District's evolving economy.

"The University of Warwick is proud to be part of the Stratford District, building on a unique 75 year legacy of research & industrial collaboration. Our Innovation Campus at Wellesbourne creates a dynamic environment where innovative companies can co-locate within commercial offices, labs & workshops, working alongside world leading engineers, technologists & academics to tackle the challenges shaping our future."

– Dr Mark Tock

Chief Operations Officer, University of Warwick Innovation Campus, Stratford-upon-Avon
